Islamic University College in collaboration with the Islamic Research and Training Institute this book will be of interest to students policymakers practitioners and researchers in the areas of Islamic finance and Islamic economics *A Malaysian Study of Mixed Methods* Ruhizal Roosli, 2017-05-11 This book consists of ten chapters focusing on how to combine quantitative with qualitative methods in a research project The approach of combining both methods is called Triangulation In the social sciences triangulation is often used in combining several research methods to study one subject However it is not in itself a method in the same way as a quantitative or qualitative approach with a specific paradigm Triangulation is a plan structure and investigation strategy deployed to obtain answers to problems identified at an earlier stage and is widely used by researchers due to its capability in cross checking the validity of findings and its minimal risk of bias This book details the triangulation approach through its use in a real research project Although there are a number of books which discuss general research guidelines and methods there is a notable lack of such books in social sciences which provide an example of integrating quantitative and qualitative methods in one research project As such the contents of this book will be useful to students academicians and practitioners conducting research work

Jarang sekali kita memiliki pengalaman yang sama. Lantaran itu perkongsian pengalaman merupakan satu perkara yang penting kerana daripada pengalaman seseorang memungkinan kita untuk belajar menghargai serta menghayati sesuatu yang mungkin tidak pernah kita alami. Meskipun banjir ialah perkara lumrah yang berlaku hampir setiap tahun di negara kita dan seolah-olah suatu kebiasaan bencana yang dialami saban tahun, namun pengalaman daripada dalam diri individu itu sendiri jarang dinukilkan. Mengambil beberapa tema yang penting tetapi perlu ditonjolkan sebagai kesan sesuatu bencana, buku ini tidak hanya menyentuh aspek teori dalam memerihalkan tentang sesuatu kesan bencana tetapi juga dari sudut pandang mangsa sendiri.

Bisri, 2021-12-03 This book aims to provide insight into how Southeast Asian countries have responded to disasters recovered and rebuilt. It investigates emergency response and disaster recovery cases at national levels and from regional perspectives. Recovery from great disasters poses great challenges to affected countries in terms of organization financing and opportunities for post disaster betterment. Importantly disasters are critical moments in which to achieve disaster risk reduction especially in the context of climate change and Sustainable Development Goals. Insights from these cases can help other countries better prepare for response and recovery before the next disaster strikes. While the experiences of disaster risk reduction and climate change implementation in Southeast Asian countries have been well documented, tacit knowledge from emergency response and recovery from these countries has not been transformed into explicit knowledge. There are only a few books that integrate information and lessons from post disaster governance in Southeast Asia as a region and because of the importance of providing real and recent situations this book will interest many policymakers practitioners and academics. The information presented here will lead to a better understanding of how to plan for future disasters and improve governance to ensure effective emergency response as well as encouraging a build back better and safer towards a more resilient and sustained recovery.
