Fleckenstein, 2022-10-21 Focusing on overt and covert violence and bringing attention to the many ways violence inflects and infects the teaching administration and scholarship of composition Violence in the Work of Composition examines both forms of violence and the reciprocal relationships uniting them across the discipline Addressing a range of spaces the collection features chapters on classroom practices writing centers and writing program administration examining the complicated ways writing instruction is interwoven with violence as well as the equally complicated ways writing teachers may recognize and resist the presence and influence of violence in their work This book provides a focused nuanced and systematic discussion of violence and its presence and influence across pedagogical and administrative sites Violence in the Work of Composition offers a close look at the nature of violence as it emerges in the work of composition provides strategies for identifying violence especially covert violence addressing its impact and preventing its eruption across many sites and invites readers to reflect on both the presence of violence and the hope for its cessation Contributors consider first how compositionists can recognize the ways their work inadvertently enacts and or perpetuates violence and second how they can intervene and mitigate that violence Rich with the voices of myriad stakeholders Violence in the Work of Composition initiates an essential conversation about violence and literacy education at a time when violence in its many forms continues to shape our culture communities and educational systems Contributors Kerry Banazek Katherine Bridgman Eric Camarillo Elizabeth Chilbert Powers Joshua Daniel Lisa Dooley Allison Hargreaves Jamila Kareem Lynn C Lewis Trevor Meyer Cathryn Molloy Kellie Sharp Hoskins Ellen Skirvin Krista Speicher Sarraf Thomas Sura James Zimmerman **Military Review**, 2014 **Justifying America's Wars** Nicholas Kerton-Johnson, 2010-09-13 This book examines the justifications for and practice of war by the US since 1990 and examines four case studies the Gulf War Kosovo Afghanistan and Iraq The author undertakes an examination of presidential speeches and public documents from this period to determine the focal points on which the respective presidents based their rhetoric for war The work then examines the practice of war in the light of these justifications to determine whether changes in justifications correlate with

changes in practice In particular the justificatory discourse finds four key themes that emerge in the presidential discourses which are tracked across the case studies and point to the fundamental driving force in US motivations for going to war The four key themes which emerge from the data are international law or norms human rights national interest and egoist morality similar too but wider than exceptionalism This analysis shows that 9 11 resulted in a radical shift away from an international law and human rights focused justificatory discourse to one which was overwhelmingly dominated by egoist morality justifications and national interest This book will be of much interest to students of US foreign policy humanitarian intervention Security Studies and IR theory **Anglicizing America** Ignacio Gallup-Diaz, Andrew Shankman, David J. Silverman, 2015-03-09

The thirteen mainland colonies of early America were arguably never more British than on the eve of their War of Independence from Britain Though home to settlers of diverse national and cultural backgrounds colonial America gradually became more like Britain in its political and judicial systems material culture economies religious systems and engagements with the empire At the same time and by the same process these politically distinct and geographically distant colonies forged a shared cultural identity one that would bind them together as a nation during the Revolution Anglicizing America revisits the theory of Anglicization considering its application to the history of the Atlantic world from Britain to the Caribbean to the western wildernesses at key moments before during and after the American Revolution Ten essays by senior historians trace the complex processes by which global forces local economies and individual motives interacted to reinforce a more centralized and unified social movement They examine the ways English ideas about labor influenced plantation slavery how Great Britain's imperial aspirations shaped American militarization the influence of religious tolerance on political unity and how Americans relationship to Great Britain after the war impacted the early republic's naval and taxation policies As a whole Anglicizing America offers a compelling framework for explaining the complex processes at work in the western hemisphere during the age of revolutions Contributors Denver Brunsman William Howard Carter Ignacio Gallup Diaz Anthony M Joseph Simon P Newman Geoffrey Plank Nancy L Rhoden Andrew Shankman David J Silverman Jeremy A Stern *U.S. Marines in Iraq, 2004-2008* Marine Corps University (U.S.). History Division, 2010 The selections in this collection include journalistic accounts scholarly essays and Marine Corps summaries of action Our intent is to provide a general overview to educate Marines and the general public about this critical period in the history of the U S Marine Corps the United States and Iraq Many of the conclusions are provisional and are being updated and revised as new information and archival resources become available The accompanying annotated bibliography provides a detailed overview of where current scholarship on the period currently stands Foreword [The Dark Side](#) Young Park, 2012-11-17 The history of the United States is the history of people who migrated to America from all parts of the world As a result American society is composed of many unique cultures and races Unfortunately the uniqueness of these cultures is one of the underlying causes of tension and conflict in America resulting in racism religious intolerance and class warfare In spite of

this the multi racial nature of American society is an integral part of Americas strength as a nation Thousands of immigrants from unique cultures who speak totally different languages came to find a better life in America But they were never accepted by the dominate white Christians The immigrants had to fight for the right to be in America Racism race riots and genocide are integral parts of the lives of immigrants The racial complexion of America is changing in the twenty first century In a short time the non white population will be the majority Social economic and political changes are already taking place Unfortunately the dominate power holders and white middle classes have not adjusted to these changes The unique system of government and economics developed over the years has reached a point that many believe will end the American Empire There is a certain bias in this presentation and criticism is aimed at the extreme beliefs and actions of a large segment of Americans particularly white Christians They have been the dominant political social and economic forces in the country Any assessment of the American system becomes a criticism of that segment of Americans Their beliefs and actions represent the Dark Side of America
