Smart Solutions to Climate Change Bjørn Lomborg, 2010-09-09 The failure of the Copenhagen climate conference in December 2009 revealed major flaws in the way the world's policymakers have attempted to prevent dangerous levels of increases in global temperatures The expert authors in this specially commissioned collection focus on the likely costs and benefits of a very wide range of policy options including geo engineering mitigation of CO2 methane and black carbon expanding forest research and development of low carbon energy and encouraging green technology transfer For each policy authors outline all of the costs benefits and likely outcomes in fully referenced clearly presented chapters accompanied by shorter critical alternative perspectives To further stimulate debate a panel of economists including three Nobel laureates evaluate and rank the attractiveness of the policies This authoritative and thought provoking book will challenge readers to form their own conclusions about the best ways to respond to global warming

Environmental Political Philosophy Wojciech W. Gasparski, 2017-07-28 The need for solutions to environmental problems is urgent Expanded environmental research and knowledge along with interest in environmental issues has focused attention on the social political and practical aspects of environmental problems Environmental Political Philosophy searches for common environmental goals values and policies in society An essential undercurrent in political theory about the environment is that such issues are not questions of efficiency or technology They cannot simply be addressed through knowledge of processes and mechanics of nature by boosting or targeting research or by allocating of

resources and development of technology Neither can they be resolved solely by increasing civic understanding and mounting environmental campaigns or requiring endless eco friendly actions A crucial element of environmental political philosophy is highlighted through the studies in this volume which address the question of what constitutes efficient action or effective decision making Praxiology commences with empirical orientation but does so by maintaining the important sense that in the evaluation of actions and policies ethical considerations must be employed in conjunction with effectiveness and efficiency

Valuing Ecosystem Services National Research Council, Division on Earth and Life Studies, Water Science and Technology Board, Committee on Assessing and Valuing the Services of Aquatic and Related Terrestrial Ecosystems, 2005-05-14 Nutrient recycling habitat for plants and animals flood control and water supply are among the many beneficial services provided by aquatic ecosystems In making decisions about human activities such as draining a wetland for a housing development it is essential to consider both the value of the development and the value of the ecosystem services that could be lost Despite a growing recognition of the importance of ecosystem services their value is often overlooked in environmental decision making This report identifies methods for assigning economic value to ecosystem services even intangible ones and calls for greater collaboration between ecologists and economists in such efforts

The Climate Solutions Consensus National Council for Science and the Environment, 2012-06-22 In 2007 the Intergovernmental Panel on Climate Change shared the 2007 Nobel Peace Prize with former Vice President Al Gore for its reporting on the human causes of climate change In 2008 the National Council for Science and the Environment reported that the acceleration of climate change is already faster than the IPCC projected only a year earlier How we deal with the rapid environmental changes and the human forces that are driving these changes will be among the defining issues of our generation *Climate Solutions Consensus* presents an agenda for America It is the first major consensus statement by the nation's leading scientists and it provides specific recommendations for federal policies for state and local governments for businesses and for colleges and universities that are preparing future generations who will be dealing with a radically changed climate The book draws upon the recommendations developed by more than 1200 scientists educators and decision makers who participated in the National Council for Science and the Environment's 8th National Conference on Science Policy and the Environment After presenting a lucid narrative of the science behind climate change and its solutions *Climate Solutions Consensus* presents 35 practical results oriented approaches for minimizing climate change and its impacts It clearly spells out options for technological societal and policy actions And it deals head on with controversial topics including nuclear energy ocean fertilization and atmospheric geo engineering One of the book's key conclusions is that climate solutions are about much more than energy sources They involve re-examining everything people do with an eye toward minimizing climate impacts This includes our eating habits consumption patterns transportation building and housing forestry land use education and more According to these scientists the time to act is now With clarity and urgency they tell us exactly what needs to be done

to start reversing the driving factors behind climate change minimizing their consequences and adapting to what is beyond our power to stop

Newhall Ranch Resource Management and Development Plan and Spineflower Conservation Plan, 2009

Protected Area Management Barbara Sladonja, 2012-08-08 Protected areas are at the base of the most national and international conservation strategies Due to the many unpredictable elements in ecology matters each protected area requires a case specific set of guidelines but a common issue is how to cope with human interaction The management of protected areas is replete with challenges and the only way to gain understanding and achieve greater management possibilities is to exchange experiences and knowledge Environmental managers are aware of that and together with scientists are looking for more modern and better solutions both with respect to natural resources and human interactions in many issues regarding nature protection This publication presents reviews and research results on protected areas management as well as 12 case studies derived from around the world with the aim of improving management effectiveness of the protected areas

Politics and Policies for Water Resources Management in India M. Dinesh Kumar, 2020-06-29 This comprehensive volume explores the interface between politics and policy making in the water management sector of India The authors discuss the nature of the political discourse on water management in India and what characterizes this discourse They also explore how this discourse has influenced the process of framing water related policies in India particularly through the academics bureaucrat politician nexus and the growing influence of the civil

society groups on policy makers which are the defining feature of this process and which have produced certain policy outcomes that are not supported by sufficient scientific evidence The book reveals that the social and management sciences despite being increasingly relevant in contemporary water management are unable to impress upon traditional engineer dominated water administration to seek solutions to complex water problems owing to a lack of interdisciplinary perspective in their research The authors also examine the current deadlock in undertaking sectoral reforms due to existing water policies not being honoured This collection includes several research studies which suggest legal institutional policy alternatives for addressing the problems in areas such as irrigation rural and urban water supply flood control and adaptation to climate variability and change It was originally published as a special issue of the International Journal of Water Resources Development

The Economics of Ecosystems and Biodiversity: Ecological and Economic Foundations Pushpam Kumar,2012-12-20 Human well being relies critically on ecosystem services provided by nature Examples include water and air quality regulation nutrient cycling and decomposition plant pollination and flood control all of which are dependent on biodiversity They are predominantly public goods with limited or no markets and do not command any price in the conventional economic system so their loss is often not detected and continues unaddressed and unabated This in turn not only impacts human well being but also seriously undermines the sustainability of the economic system It is against this background that TEEB The Economics of Ecosystems and Biodiversity project was set up in 2007 and led by the United Nations Environment Programme to provide a comprehensive global assessment of economic aspects of these issues This book written by a team of international experts represents the scientific state of the art providing a comprehensive assessment of the fundamental ecological and economic principles of measuring and valuing ecosystem services and biodiversity and showing how these can be mainstreamed into public policies This volume and subsequent TEEB outputs will provide the authoritative knowledge and guidance to drive forward the biodiversity conservation agenda for the next decade

Ecological Economics Research Trends Carolyn C. Pertsova,2007 This new book presents important research in the field of ecological economics which is a trans disciplinary field of academic research that addresses the dynamic and spatial interdependence between human economies and natural ecosystems Ecological economics brings together and

connects different disciplines within the natural and social sciences but especially between these broad areas Ecological economics presents a more pluralistic approach to the study of environmental problems and policy solutions characterised by systems perspectives adequate physical and biological contexts and a focus on long term environmental sustainability

Protecting The Environment, Privately Jeffrey W Bennett, 2015-06-24 Most volumes in the environmental economics literature consider the environment to be a public good and hence write out a role for the private sector in a source of supply Yet there is ample evidence of the private sector being involved driven both by profit and altruism This book provides the necessary conceptual base for the inclusion of the private sector in the environmental protection supply equation and deliver an extensive set of examples in a wide range of contexts In an economic climate where governments are attempting to reduce expenditures the increased role for the private sector will be readily embraced by policy makers The aim of the book is to establish the principles of markets in the provision of environmental protection and to provide an extensive experience based set of contexts in which the private sector has acted to enhance the supply of environmental goods and services These contexts include both pure private sector initiatives in terrestrial aquatic and marine ecosystems and public private sector joint initiatives such as payment for environmental services PES schemes The Oxford Handbook of Law and Economics Francesco Parisi, 2017-04-27 Covering over one hundred topics on issues ranging from Law and Neuroeconomics to European Union Law and Economics to Feminist Theory and Law and Economics The Oxford Handbook of Law and Economics is the definitive work in the field of law and economics The book gathers together scholars and experts in law and economics to create the most inclusive and current work on law and economics Edited by Francisco Parisi the Handbook looks at the origins of the field of law and economics tracks its progression and increased importance to both law and economics and looks to the future of the field and its continued development by examining a cornucopia of fields touched by work in law and economics The uniqueness of its breadth depth and convenience make the volume essential to scholars students and contributors in the field of law and economics **International Review for Environmental Strategies**, 2003 *Public Goods and Externalities Agri-environmental Policy Measures in Selected OECD Countries* OECD, 2015-08-26 Agriculture is a provider of commodities such as food feed fibre and fuel and it can bring both positive and negative impacts on the environment Yet most policy measures target farm systems inputs and practices and agricultural infrastructure driving forces rather than the provision of **Handbook of Research on Global Challenges for Improving Public Services and Government Operations** Babaoğlu, Cenay, Akman, Elvettin, Kulaç, Onur, 2020-11-20 As the field of public administration has been changing due to globalization government reforms and increasing governance practices within intergovernmental networks research and teaching in public administration also adapted itself to these changes Public policy research and instruction has become transformed and has diffused into other countries with the help of international organizations and other agents of change and transfer Research in this field is seen as an opportunity for a definitive shift

from traditional models of public administration in the sense that policies may be better designed articulated and governed through a collaborative approach while service provision could be enhanced in terms of proximity representativeness and innovativeness The Handbook of Research on Global Challenges for Improving Public Services and Government Operations provides comprehensive approaches to the study of public administration and public policy from a comparative perspective and includes sound theories and concepts for understanding opportunities and challenges governments face when seeking to improve public services and government operations The book is a compilation of selective high quality chapters covering cases experiences and practical recommendations on topics related to public administration public policy social policy public management and public affairs This book is ideal for policymakers students and researchers in the field of public administration public policy governance public management public affairs citizen engagement and administrative sciences and management along with practitioners stakeholders and academicians interested in the best practices of various countries in public administration and policy

Empowering the Great Energy Transition Scott Valentine, Benjamin K. Sovacool, Marilyn Brown, 2019-12-17 At a time when climate change deniers hold the reins of power in the United States and international greenhouse gas negotiations continue at a slow crawl what options are available to cities companies and consumers around the world who seek a cleaner future Scott Victor Valentine Marilyn A Brown and Benjamin K Sovacool explore developments and strategies that will help fast track the transition to renewable energy They provide an expert analysis of the achievable steps that citizens organizational leaders and policy makers can take to put their commitments to sustainability into practice Empowering the Great Energy Transition examines trends that suggest a transition away from carbon intensive energy sources is inevitable there are too many forces for change at work to stop a shift to clean energy Yet under the status quo change will be too slow to avert the worst consequences of climate change Humanity is on a path to incur avoidable social environmental and economic costs Valentine Brown and Sovacool argue that new policies and business models are needed to surmount the hurdles separating the current consumption model from a sustainable energy future Empowering the Great Energy Transition shows that with well placed efforts we can set humanity on a course that supports entrepreneurs and communities in mitigating the environmental harm caused by technologies whose time has come and gone
