*Algae and Environmental Sustainability* Bhaskar Singh,Kuldeep Bauddh,Faizal Bux,2015-12-22 This book presents the dynamic role of algae in a sustainable environment Two major aspects namely bioenergy and bioremediation have been elaborated in various chapter contributed by scientists and teachers from different geographical areas throughout the world Algal biofuels is an emerging area of equal interest to researchers industries and policy makers working or focusing on alternative i e renewable fuels Algae have been an area of interest due to their wide range of applications Over the last 5 decades eukaryotic algae have been used in the aquaculture industry as feed for invertebrates providing a rich source of antioxidants dietary fiber minerals and protein More recently there has been a focus on the use of algal biomass in the development of alternative fuels The extraction of oil from algae has been widely explored as a much more viable feedstock than plant based oils in large scale fuel production using algae as feedstock has the advantages that it doesn t require arable land and that wastewater can be used as a source of nutrients in their culture The multifunctional approach of algae includes pollution remediation carbon sequestration biofuels production and delivery of value added products However there are still some obstacles that need to be overcome to make their use as potential feedstock for biofuels techno economically feasible In order to maintain the sustainability aspect of algal biofuels various aspects have to be studied and critically analyzed to assess the long term sustainability of algal derived biofuels This book discusses the role of algae as a promising future feedstock for biofuels They are known to sequester carbon in much larger amounts than plants and as such the book also

describes their phycoremediation potential for conventional as well as emerging contaminants It describes the role of anaerobic digestion in algal biorefineries bioreactions and process parameters biogas recovery and reuse The role of algal biofilm based technology in wastewater treatment and transforming waste into bio products is discussed and remediation of sewage water through algae is assessed The book also describes the production of biohydrogen bio oil biodiesel and the major bottlenecks in their usage The emerging characterization techniques of these biofuels bio oil and biodiesel are described as are the decolorizing potential of algae and the genetic engineering techniques that could enhance the production of lipids in algae Other aspects of the book include the role of remote sensing technology in the monitoring of algae and a life cycle assessment of algal biofuels *Mastering Practicals Community Medicine* Poornima Tiwari,2019-07-12

*Mastering practical s community medicine* is designed to help students prepare for practical examinations *Preservation and Restoration Techniques for Ancient Egyptian Textiles* Ahmed, Harby E.,Al-Zahrani, Abdalnaser Abdulrahman,2022-12-19 Preservation and restoration techniques are essential in maintaining the integrity of historic artifacts including textiles and specifically the materials of the textile industry in Egypt The technologies methods and advancements in preserving these ancient artifacts are growing areas of research and important factors in increasing knowledge of the conservation process By offering and increasing the knowledge field with practical applications of preservation and restoration techniques both old and new the industry will continue to advance *Preservation and Restoration Techniques for Ancient Egyptian Textiles* provides critical research on the history technology and materials of the textile industry in Egypt through the ages It includes the integration of scientific examinations and digital precise documentation in the preservation of Ancient Egyptian textiles the deterioration aspects and their effect on historical textiles and novelty preservation methods and the preventive conservation of historical textiles in museums The book deals with the restoration methods of historical textiles such as documentation various cleaning processes fixing supporting display and storage methods as well as incorporating modern science techniques such as nanoscience enzymes plasma lasers and more It is essential for historians and archeologists conservators specialists in art history museum specialists restoration professionals practitioners researchers academicians and students interested in the latest conservation and restoration techniques specifically focused on ancient Egyptian textiles

**Science Reporter** ,2004 **Mycoremediation and Environmental Sustainability** Ram Prasad,2018-01-14

Bioremediation is the use of microorganisms metabolism to degrade waste contaminants sewage domestic and industrial effluents into non toxic or less toxic materials by natural biological processes Remediation through fungi or mycoremediation has multifarious possibilities in applied remediation engineering and the future of environmental sustainability Fungi have the biochemical and ecological capability to degrade environmental organic chemicals and to decrease the risk associated with metals semi metals noble metals and radionuclides either by chemical modification or by manipulating chemical bioavailability Additionally the capability of these fungi to form extended mycelia networks the low specificity of their

catabolic enzymes and their using pollutants as a growth substrate make these fungi well suited for bioremediation processes Their mycelia exhibit the robustness of adapting to highly limiting environmental conditions often experienced in the presence of persistent pollutants which makes them more useful compared to other microbes However despite dominating the living biomass in soil and being abundant in aquatic ecosystems fungi have not been exploited for the bioremediation of such environments This book covers the various types of fungi and associated fungal processes used to clean up waste and wastewaters in contaminated environments and discusses future potential applications
