Matemáticas: un enfoque de resolución de problemas para maestros de educación básica Rick Billstein, Shlomo Libeskind, Johnny W. Lott, 2013-02-22 La obra debe ser libro de cabecera de los maestros de enseñanza básica y media. Su amplia difusión provocará un asombroso impacto positivo en la calidad de la educación. Está diseñado para que con un conocimiento sólido de los contenidos académicos de matemáticas los maestros adquieran confianza y seguridad en los cursos que imparten, mejoren su metodología y capacidad didáctica y finalmente estén en óptimas condiciones para acoplarse a la inevitable evolución de planes y programas de estudio.

*Collecting for the Curriculum* Amy J. Catalano, 2015-09-28 If you are a librarian charged with collecting curriculum materials and children's literature to support the Common Core State Standards then this book is the only one that offers explicit advice on collection development in curriculum collections. It is for you. While there are many publications on the Common Core for school librarians and K-12 educators no such literature exists for curriculum librarians at the post secondary level. This book fills that gap standing alone as a guide to collection development for curriculum librarians independent of the Common Core State Standards (CCSS). The book provides instruction and guidance to curriculum librarians who acquire and manage collections so you can develop a collection based on best practices. The book begins with a primer on the CCSS and how curriculum librarians can support them. Discussion of the Standards is then woven through chapters arranged by content area that share research based practices in curriculum development and instruction to guide you in curriculum selection. Material types covered include games, textbooks, children's literature, primary sources, counseling and nonfiction. Additional chapters cover the management of curriculum collections, testing, collections and instruction and reference as well as how to support and collect for special needs learners. Current practices in collection development for curriculum materials librarians are also reviewed. The book closes with a discussion of the future of curriculum materials.

**Tyranny of the Textbook**, **Tyranny of the Textbook** Beverlee Jobrack, 2011-12-23 Educational reforms and standards have been a topic of public debate for decades with the latest go-round being the State Common Core Curriculum Standards. But time and again those reforms have failed and each set of standards no matter how new and different has had little impact on improving student achievement. Why? The textbooks. Textbooks sell based on design and superficial features not because they are based on the latest research on how children learn and how well they promote student achievement. In *Tyranny of the Textbook* Beverlee Jobrack, retired from educational publishing, sheds light on why this happens. She gives an

engaging and fascinating look behind the scenes of how K 12 textbooks are developed written adopted and sold And perhaps most importantly she clearly spells out how the system can change so that reforms and standards have a shot at finally being effective Did you know Reform efforts have focused on writing and rewriting standards and tests but these rarely have any effect on the core curriculum that is published School districts and states don t use effectiveness as a criterion for evaluating and purchasing textbooks Publishers don t offer textbooks with better content or the latest teaching methods because teachers don t want textbooks that require them to change their practices Teachers report that they don t rely on a textbook in their class but research shows that they do Three companies publish 75 percent of the K 12 educational materials Those three companies are producing similar programs with the same instructional strategies none of which require teachers to change their practices significantly Publishers write textbooks for California and Texas All of the other markets have to make do with books only superficially adjusted for their states
