Customer Selection Oliver Lonicer, 2002-01-11 Inhaltsangabe Abstract In the real world all customers are not created equal This allusion to the Declaration of Independence captures a recent realisation of many companies different customers represent different values to a company In fact many companies are discovering that a large percentage of their customers are generating losses XY Insurance is among those companies that recently discovered a considerable portion of unprofitable customers in their current book of business This was identified as a major problem especially considering the fact that the company is converting to a publicly traded stock company Given the necessity to produce shareholder value senior management realised that it would be indispensable to ensure the profitability of its accounts One of the factors underlying this problem at XY is the lack of a screening process to ensure the selection of customers with whom a profitable relationship can be built To address this need XY s senior management decided that it would be necessary to develop a tool that enables the sales staff to evaluate customers and ultimately to select customers based on this assessment The objective of this study is the development of a screening tool which can be used as a basis for the selection of XY s customers in the company s large case segment The development of the tool is limited to one of the company s segments because the customers as well as the products differ greatly by segment The tool should enable the company to assess their clients individually and classify each of them as attractive or unattractive so that proper strategies can be applied The strategy development lies outside of the confines of this study and is therefore not discussed in this paper I will however indicate starting points and some important issues when designing these strategies In addition considerations in conjunction with the implementation and introduction process as well as avenues for further research are addressed where appropriate White the initial idea behind the development of the screening tool was to design a mechanism that would allow for the assessment of all of XY s customers existing and prospective it became apparent that this would not be feasible Separate tools for both stages are needed As a result it was decided that a model outlining the needed criteria would be developed and based on this a screening tool for prospective clients would be built The Airline Operations and Management Gerald N. Cook, Bruce G. Billig, 2023-05-04 Airline Operations and Management A Management Textbook presents a survey of the airline industry with a strong managerial perspective It integrates and applies the fundamentals of several management disciplines particularly operations marketing economics and finance to develop a comprehensive overview It also provides readers with a solid historical background and offers a global perspective of the industry with examples drawn from airlines around the world Updates for the second edition include Fresh data and examples A range of international case studies exploring real life applications New or increased coverage of key topics such as the COVID 19 pandemic state aid and new business models New chapters on fleet management and labor relations and HRM Lecture slides for instructors This textbook is for advanced undergraduate and graduate students of airline management but it should also be useful to entry and junior level airline managers and

professionals seeking to expand their knowledge of the industry beyond their functional area *Value-based Marketing Strategy* Santiago Lopez, 2020-10-06 This book offers novel methods for developing Value based marketing strategies aimed at increasing revenue and profits The Value concept relates all the benefits offered by a product with its price and the effort required to obtain it Global competition requires managing Value rather than individual products or brands This fosters customer loyalty and provides a solid basis for relationship marketing The book takes a practical step by step approach to explain How the forces of supply and demand interact with customer Value The relationships between benefits quantities prices and costs How to develop effective competitive strategies How to manage inventory and product mix efficiently How to apply the Value model to increase profitability and solve major marketing problems The book sets forth several new approaches for marketing and pricing decision making The concept of Value integrates marketing finance economics and accounting in order to link Value based pricing with relationship marketing The law of supply and demand is restated with quantity as a function of Value instead of price this makes it a more realistic and practical tool for understanding today s highly competitive business environment The confrontation and complementation concepts provide useful tools for guiding marketers into new segments and pricing products accordingly They play a key role for devising win win strategies not only with customers but also with competitors The Value Matrix is a practical tool for understanding the product s positioning analyzing its competition setting prices and developing strategy It aims at achieving an optimal balance between customer loyalty and product mix profitability The Value Life Cycle illustrates how Value acts as a force that constantly changes revenue providing insight for developing strategies in each phase of the product s life cycle Analogies with physics illustrate how policy constraints create resistance to sales velocity thereby determining the rate at which a firm advances towards its financial and marketing goals The strategy for pricing business services applies Value to balance supply with demand this leads to increased revenue The marketing approach set forth unifies product portfolio and inventory management with Value based pricing for maximizing income Clear explanations and accessible language make this book ideal for marketing professionals and non specialists Advanced readers may refer to the appendices where the subjects are analyzed further and the mathematical foundations are laid out numerous solved problems of pricing and costs are included
