Ethical Issues and Social Dilemmas in Knowledge Management: Organizational Innovation Morais da Costa, Goncalo Jorge, 2010-09-30 This book considers ethical issues and social dilemmas at two levels the individual vs individual and the individual vs the collective providing a thorough treatment of these facets and demonstrating the philosophical underpinnings of each dimension of knowledge management Provided by publisher Ethics as Social Conscience Walter L. Battaglia, 2007 Battaglia departs from the beaten paths of ethical theory by proposing that morality is social in nature and that moral maxims and values are the result of interactive processes Philosophy Religious and Theological Abstracts, 2004 Conspiracy Theories in Contemporary Italy Gianmarco Navarini, 2024-11-25 This volume explores the role played by conspiracy narratives in the contemporary Italian political cultural and social context through a series of case studies It begins with a historical and genealogical account of the troubled success of Italian conspiracy thinking from the early 1970s to the present day Among the issues examined are the unclear division between legitimate illegitimate forms of knowledge the use of conspiracy as a confrontational discursive device the emergence of moral panic and the stabilization of information outlets against dominant official explanations The analysis covers the case of a well known national survey and a digital platform specializing in conspiracy storytelling The second axis of the book concerns the pervasive use of conspiracy as a theory or narrative that currently circulates in various Italian cultural fields multiculturalism immigration and racism Catholic traditionalism football fandom small business economics and cooking and food This volume will be of interest to researchers of conspiracy theories and Italian politics and history **Normative Theory and Business Ethics** Jeffery D. Smith, 2008-10-23 Since its inception thirty years ago business ethics has benefited from the interdisciplinary contributions by management political theory sociology and of course philosophy This volume provides an updated examination of the role that moral and political philosophy can play in addressing problems in business ethics The essays contained within its pages represent the work of new scholars and address a wide array of foundational issues such as distributive justice within firms human rights ethical challenges of international business the role of virtue in business management entrepreneurship and the relationship of markets and market actors with democratic institutions In an important sense this collection traces where philosophy has been and where it is headed within business ethics Each of the contributions represent new work that at once strengthens the theoretical foundations of normative business ethics and provides practical insight for non philosophers working in the field **A Level Psychology Through Diagrams** Grahame Hill, 2001 DT These highly successful revision guides have been brought right up to date for the new A Level specifications introduced in September 2000 DT Oxford Revision Guides are highly effective for both individual revision and classroom summary work The unique visual format makes the key concepts and processes and the links between them easier to memorize DT Students will save valuable revision time by using these notes instead of condensing their own DT In fact many students are choosing to buy their own

copies so that they can colour code or highlight them as they might do with their own revision notes

comprehensive introduction to ethics as it applies to space exploration and use. It examines real world case studies that exemplify the ethical challenges we face in exploring beyond Earth: space debris, militarization in space, hazardous asteroids, planetary protection, the search for extraterrestrial life, commercial and private sector activities in space, space settlements, very long duration missions, and planetary scale interventions. Major themes include human health, environmental concerns, safety and risk, governance and decision making, and opportunities and challenges of multidisciplinary and international contexts. Ideal for classroom use and beyond, the book provides ways of thinking that will help students, academics, and policymakers examine the full range of ethical decisions on questions related to space exploration.

This unique text promotes ethical decision making and action through skill development, self assessment, and application exercises. In the Fourth Edition, a new chapter, Ethical Crisis Leadership, explains five ethical principles and strategies that are essential to fulfilling moral duties during times of crisis. Leadership Ethics at the Movies features present short summaries of feature films that portray ethical dilemmas. Discussion starters are included to prompt readers to draw ethical implications and applications from the films. Self Assessment features measure the reader's performance on an important behaviour, skill, or concept discussed in the chapter. Three cases per chapter offer real world examples for analysis and reflection. A lengthy reference section at the end of the book serves as a starting point for further research and exploration. Instructors Resources include teaching strategies, a test bank, sample syllabi, assignment descriptions, and more.

The Ethics of Intensification Paul B. Thompson, 2008-09-19. The Ethics of Agricultural Intensification: An Interdisciplinary and International Conversation. Paul B. Thompson and John Otieno Ouko. Global agriculture faces a number of challenges as the world approaches the second decade of the third millennium. Predictions unilaterally indicate dramatic increases in world population between 2010 and 2030, and a trend in developing countries toward greater consumption of animal products could multiply the need for production of basic grains even further. Although global food production in 2000 was estimated to be adequate for the existing population, hunger and malnutrition are persistent problems that have led decision makers to recognize that increasing food production in specific regions may be the most effective way to address food security for impoverished peoples. At the same time, there will need to be policy adjustments that improve poor people's access to current food supplies without simultaneously undercutting the ability of local producers to obtain needed cash income. What is more, the uncertain effects of global climate change on

agricultural ecosystems complicate planning for this process while poorly understood processes of globalization create additional unknowns from the side of social systems In short despite surpluses in many parts of the developed world finding ways to increase food production on both selected regional and a total global basis remains a priority for many farmers policy makers and agricultural researchers

A Case for

Legal Ethics Vincent Luizzi,1993-01-01 In suggesting that general ethics be modeled on legal ethics this book is a call for more creativity in our moral experience Luizzi argues that lawyers regularly re think their roles and the rules related to these roles Their rejection of a prohibition on advertising for example was part of their re thinking of the traditional view of the lawyer's noble calling one for whom advertising was inappropriate What this says for general ethics is that we are to become active participants in defining our roles Our daily experiences can help us in constructing fresh and better conceptions to guide us A Case for Legal Ethics rejects fixed conceptions of human nature and extends our constructive efforts beyond specific roles to human nature itself and to our environments Luizzi appeals to role modeling both to keep our constructed conceptions within moral bounds and to develop the literature on moral education We must be willing for others to imitate us as we live according to the conceptions we construct
