*Brexit, President Trump, and the Changing Geopolitics of Eastern Europe* Theodor Tudoroiu, 2018-04-05 This book

analyzes the combined consequences of Brexit and of the new US foreign policy under President Trump on the geopolitical situation of Eastern Europe. It perceives the evolution of the East European regional security complex as a struggle between the European Union's Kantian win-win geopolitical vision and Russia's neoclassical geopolitics also promoted by President Trump. In the most probable scenario, the latter approach will have the upper hand. The EU's post-Brexit control by the Franco-German axis will likely be followed by the geopolitical irrelevance of the EU due to the renationalization of member states' foreign policy, with Germany becoming the main West European actor. Consequently, Eastern Europe will be turned into the arena of a mainly three-cornered neoclassical geopolitics rivalry opposing Russia, the Franco-German axis, and then Germany and the US in alliance with the post-Brexit UK and certain East European states. The book will appeal to scholars across the fields of International Relations, Geopolitics, European Studies, and Area Studies. *The European Union and Europe's New Regionalism* Boyka M. Stefanova, 2017-10-24. This book presents a new approach to studying the European Union's regional and global relevance. It recasts into a dynamic perspective the three most significant systemic processes that define the EU as a regionalist project: its enlargement, neighborhood, and mega-regional policies. The book argues that these processes collectively demonstrate a dynamic shift of the core tenets of European regionalism from an inward-looking process of region building to an open selective system of global interactions. Managing Country Risk in an Age of Globalization Michel Henry Bouchet, Charles A. Fishkin, Amaury Goguel, 2018-08-04. This book provides an up-to-date guide to managing Country Risk. It tackles its various and interlinked dimensions, including sovereign risk, socio-political risk, and macroeconomic risk for foreign investors, creditors, and domestic residents. It shows how they are accentuated in the global economy together with new risks such as terrorism, systemic risk, environmental risk, and the rising trend of global volatility and contagion. The book also assesses the limited usefulness of traditional yardsticks of Country Risk, such as ratings and rankings, which at best reflect the market consensus without predictive value and at worst amplify risk aversion and generate crisis contamination. This book goes further than comparing a wide range of risk management methods in that it provides operational and forward-looking warning signs of Country Risk. The combination of the authors' academic and market-based backgrounds makes the book a useful tool for scholars, analysts, and practitioners. *Covid-19 and International Business* Marin A.
