The Economics of Inflation - A Study of Currency Depreciation in Post War Germany Costantino Bresciani-Turroni, Lionel Robbins, 2011-03-23 The depreciation of the mark of 1914 23 which is the subject of this work is one of the outstanding episodes in the history of the twentieth century Not only by reason of its magnitude but also by reason of its effects it looms large on our horizon It was the most colossal thing of its kind in history and next probably to the Great War itself it must bear responsibility for many of the political and economic difficulties of our generation It destroyed the wealth of the more solid elements in German society and it left behind a moral and economic disequilibrium apt breeding ground for the disasters which have followed Hitler is the foster child of the inflation The financial convulsions of the Great Depression were in part at least the product of the distortions of the system of international borrowing and lending to which its ravages had given rise If we are to understand correctly the present position of Europe we must not neglect the study of the great German inflation If we are to plan for greater stability in the future we must learn to avoid the mistakes from which it sprang There is another reason why the history of this episode is peculiarly significant to students of the social sciences Accidents to the body politic like accidents to the physical body often permit observations of a kind which would not be possible under normal conditions In peaceful times we may speculate concerning the consequences of violent change But we are naturally precluded from verifying our conclusions we cannot upset the smooth current of things for the advancement of abstract knowledge But when disturbance takes place it is sometimes possible to snatch good from evil and to obtain insight

into the working of processes which are normally concealed No doubt there are dangers here We must not ignore the possibility that the processes thus revealed are themselves abnormal we must not infer for instance that propositions which apply to large inflations necessarily apply without modification to small inflations But the dangers are clear it is not difficult to keep them in mind and to guard against them And the opportunities of fruitful research are enormous In this matter of the depreciation of the mark there is hardly any branch of the theory of economic dynamics which is not illuminated by examination of its grim events For both these reasons therefore I hope that this book will obtain a wide circulation among the English speaking public

The Origins of the First World War William Mulligan, 2010-03-04 Providing a new interpretation of the origins of the First World War this textbook synthesises recent scholarship and introduces the major historiographical and political debates surrounding the outbreak of the war William Mulligan argues that the war was a far from inevitable outcome of international politics in the early twentieth century and suggests instead that there were powerful forces operating in favour of the maintenance of peace His fresh perspective on the pre war international system takes account of new approaches to the study of international politics since the end of the Cold War and the acceleration of globalisation Thematic chapters examine key issues including the military public opinion economics diplomacy and geopolitics and analyse relations between the great powers the role of smaller states the disintegrating empires and the July crisis This compelling account will significantly revise our understanding of diplomacy political culture and economic history from 1870 to 1914

The Great War and Urban Life in Germany Roger Chickering, 2007-02-08 Roger Chickering offers the most comprehensive history ever written of a German city at war

Aftermaths of War Ingrid Sharp, Matthew Stibbe, 2011-02-14 Much of the recent literature on cultural demobilisation or remobilisation after the First World War has focused on men and masculinity By contrast this interdisciplinary volume of essays sets out to examine the importance of women's movements and individual female activists to the shaping of post war Europe at the private communal national and transnational levels Key themes include the commemoration of the war dead the renegotiation of gender roles suffrage and political rights and women's contribution to the establishment of new visions of peace or national revenge and regeneration in the years 1918 to 1923 The eighteen chapters cover countries in Central and Eastern Europe as well as Western Europe and defeated as well as victorious nations thus allowing for a more nuanced understanding of the deep impact of the war and its aftermath on the continent as a whole Contributors are Nikolai Vukov Emma Schiavon Christiane Streubel Erika Kuhlman Ann Rea Ingrid Sharp Olga Shnyrova Fatmira Musaj and Beryl Nicholson Christine Bard Gabriella Hauch Judith Szapor Sylwia Ku ma Markowska Virginija Jur nien Judit Acs dy Matthew Stibbe Bruce Berglund David Hudson and Jill Liddington

Writing Resistance in the Second World War Jane L. Chapman, 2024-07-17 This book aims to extend existing historical literary and media knowledge of neglected written voices as a form of print participation in the Second World War Uniquely it is framed by an awareness of contemporary requirements for both secrecy and deception which it is argued were

nevertheless characterised by a rare participatory inclusivity in terms of writers and audiences that has hitherto only been perceived as a characteristic of citizen s journalism in the internet age Comparative cases of resistance using newspapers during the Second World War comprise original and clandestine sources from France Belgium the Netherlands Norway and Britain analysed for the effect that intelligence and planned deception had on local publications as well as on readers of resistance broadsheets

The War of 1812 in the Champlain Valley Allan S. Everest,2010-11-26 This is the story of marching men and clashing ships of suffering and of occasional heroic deeds As in wars past and for similar reasons Lake Champlain and the region surrounding Lower Canada Vermont and Upstate New York became one of the major theaters of military action For two and a half years people in the region saw armies raised defeated and disbanded They witnessed their own militia repeatedly called out to protect the border areas and to serve as adjuncts to regular army units Despite a series of disheartening military reverses loss of life and destruction of property civilians maintained a remarkable degree of resilience They fled if battle threatened but soon returned to pick up the threads of their lives Everest s story shows us a war in microcosm and allows us a close up experience of the small events that helped shape the destiny of a youthful and growing nation

The Egyptian Intelligence Service Owen L. Sirrs,2010-02-25 This book analyzes how the Egyptian intelligence community has adapted to shifting national security threats since its inception 100 years ago Starting in 1910 when the modern Egyptian intelligence system was created to deal with militant nationalists and Islamists the book shows how the security services were subsequently reorganized augmented and centralized to meet an increasingly sophisticated array of challenges including fascism communism army unrest Israel France the United Kingdom conservative Arab states the Muslim Brotherhood and others The book argues that studying Egypt s intelligence community is integral to our understanding of that country s modern history regime stability and human rights record Intelligence studies have been described as the missing dimension of international relations It is clear that intelligence agencies are pivotal to understanding the nature of many Arab regimes and their decision making processes and there is no published history of modern Egyptian intelligence in either a European language or in Arabic though Egypt has the largest and arguably most effective intelligence community in the Arab world This book will fill a clear gap in the intelligence literature and will be of much interest to students of intelligence studies Middle Eastern politics international security and IR in general
