Gallent, Gavin Parker, Amy Burnett, Ian Mell, 2025-04-09 Rural Planning Futures charts the critical societal challenges that are

reshaping rural places across the UK and Ireland The book evaluates current planning processes and explores the prospects

for an enhanced cross sectoral and holistic future practice that mediates rural change towards more resilient and sustainable

outcomes Rural places and planning have for too long been viewed as marginal to both the theory and practice of planning

However rural places are central to addressing critical global challenges from climate action through nature recovery energy

transitions and food security to water quality while also facing more localised conflicts around housing the siting of

infrastructure and the challenge of sustaining local services The policy response to these complex challenges has too often

been fragmented siloed and fixated on the short term By illustrating how key rural capitals are linked and integrated this

book argues for a reset of the rural planning narrative and for the urgent disruption of established ways of working Using

innovative case studies the chapters detail how planning for rural places must be guided by the pursuit of social value rather

than protecting private interests This book is essential reading for undergraduate and graduate students in planning
