**Gracious Rain** Richard H. Schmidt,2008-08 Using the Collects opening prayers for each Sunday and major feast day of the church year including Christmas Epiphany and the days of Holy Week and Easter Week the author offers a brief one page anecdotal meditation on the relationship of the prayer s and season s theme to the realities of life Beginning with the First Sunday of Advent Richard Schmidt takes the reader on a journey through the church year as he reflects on the mystery and challenge of our human pilgrimage *Pseudo-Riemannian Geometry, [delta]-invariants and Applications* Bang-yen Chen,2011 The first part of this book provides a self contained and accessible introduction to the subject in the general setting of pseudo Riemannian manifolds and their non degenerate submanifolds only assuming from the reader some basic knowledge about manifold theory A number of recent results on pseudo Riemannian submanifolds are also included The second part of this book is on invariants which was introduced in the early 1990s by the author The famous Nash embedding theorem published in 1956 was aimed for in the hope that if Riemannian manifolds could be regarded as Riemannian submanifolds this would then yield the opportunity to use extrinsic help However this hope had not been materialized as pointed out by M Gromov in his 1985 article published in Asterisque The main reason for this is the lack of control of the extrinsic invariants of the submanifolds by known intrinsic invariants In order to overcome such difficulties as well as to provide answers for an open question on minimal immersions the author introduced in the early 1990s new types of Riemannian invariants known as invariants which are very different in nature from the classical Ricci and scalar curvatures

At the same time he was able to establish general optimal relations between invariants and the main extrinsic invariants Since then many new results concerning these invariants have been obtained by many geometers The second part of this book is to provide an extensive and comprehensive survey over this very active field of research done during the last two decades
