Jones, 2014-09-01 A history illustrating the complexity of medical decision making and risk. Still the leading cause of death worldwide, heart disease challenges researchers, clinicians and patients alike. Each day thousands of patients and their doctors make decisions about coronary angioplasty and bypass surgery. In *Broken Hearts*, David S. Jones sheds light on the nature and quality of those decisions. He describes the debates over what causes heart attacks and the efforts to understand such unforeseen complications of cardiac surgery as depression, mental fog and stroke. Why do doctors and patients overestimate the effectiveness and underestimate the dangers of medical interventions, especially when doing so may lead to the overuse of medical therapies? To answer this question, Jones explores the history of cardiology and cardiac surgery in the United States and probes the ambiguities and inconsistencies in medical decision making. Based on extensive reviews of medical literature and archives, this historical perspective on medical decision making and risk highlights personal, professional and community outcomes. **Toxicological Survey of African Medicinal Plants** Victor Kuete, 2014-05-30 *Toxicological Survey of African Medicinal Plants* provides a detailed overview of toxicological studies relating to traditionally used medicinal plants in Africa with special emphasis on the methodologies and tools used for data collection and
