Collapse, Volume 1 Robin Mackay, 2019-01-15 An investigation of the nature and philosophical uses of number The first volume of Collapse investigates the nature and philosophical uses of number The volume includes an interview with Alain Badiou on the relation between philosophy mathematics and science an in depth interview with mathematician Matthew Watkins on the strange connections between physics and the distribution of prime numbers and contributions that demonstrate the many ways in which number intersects with philosophical thought from the mathematics of intensity to terrorism from occultism to information theory and graphical works of multiplicity *The Neurotic Turn* Charles Johns, 2017-11-16 Taking their cue from the work of Charles Johns who has argued that far from being an ailment neurosis is in fact the dominant condition of our society today an array of thinkers have gathered in The Neurotic Turn to address the question what can neurosis tell us about our current social impasse What emerges in The Neurotic Turn is the awareness that the medicalization of neurosis was merely provisional Today to understand our increasingly synthetic digitized world we cannot retreat from neurosis or pretend to offer its cure Instead we must confront it dispensing with the conventional idea of reality in order to redefine it Superpositions Rocco Gangle, Julius Greve, 2017-05-24 One of the most important French philosophers working today Fran ois Laruelle has developed an innovative and powerful repertoire of concepts across an oeuvre spanning four decades and more than twenty books His work termed non philosophy or more recently non standard philosophy has garnered international attention in recent years and stands likely to have a significant impact on the critical practices of the humanities in the near future Bringing together some of the most prominent scholars of Laruelle *Superpositions Laruelle and the Humanities* explores the intersections of Laruelle s work with multiple discourses within the humanities including philosophy critical theory political theory media studies and religious studies The book addresses two main questions In what relation does non philosophical thought stand with respect to the materials and methods of other disciplines How can Laruelle s non standard philosophy be applied appropriated and used by other discourses *Superpositions* provides a useful introduction to Laruelle s work for students and scholars and marks an important intervention into one of the most vigorous and contested areas of contemporary scholarship in the critical humanities **A Critique of Western Buddhism** Glenn Wallis, 2018-09-06 This book is open access and available on www.bloomsburycollections.com It is funded by Knowledge Unlatched What are we to make of Western Buddhism Glenn Wallis argues that in aligning their tradition with the contemporary wellness industry Western Buddhists evade the consequences of Buddhist thought This book shows that with concepts such as vanishing nihility extinction contingency and no self Buddhism like all potent systems of thought articulates a notion of the real Raw unflinching acceptance of this real is held by Buddhism to be at the very core of human awakening Yet these preeminent human truths are universally shored up against in contemporary Buddhist practice contravening the very heart of Buddhism The author s critique of Western Buddhism is threefold It is immanent in emerging

out of Buddhist thought but taking it beyond what it itself publicly concedes negative in employing the democratizing deconstructive methods of François Laruelle's non philosophy and re-descriptive in applying Laruelle's concept of philofiction Through applying resources of Continental philosophy to Western Buddhism A Critique of Western Buddhism suggests a possible practice for our time an anthropotechnic or religion transposed from its seductive but misleading idealist haven

Performing the Unstageable Karen Quigley, 2020-02-20 From the gouging out of eyes in Shakespeare's King Lear or Sarah Kane's Cleaved to the adaptation of Philip Pullman's His Dark Materials trilogy theatre has long been intrigued by the staging of challenging plays and impossible texts images or ideas Performing the Unstageable Success Imagination Failure examines this phenomenon of what the theatre cannot do or has not been able to do at various points in its history The book explores four principal areas to which unstageability most frequently pertains stage directions adaptations violence and ghosts Karen Quigley incorporates a wide range of case studies of both historical and contemporary theatrical productions including the Wooster Group's exploration of Hamlet via the structural frame of John Gielgud's 1964 filmed production Elevator Repair Service's eight hour staging of Fitzgerald's The Great Gatsby and a selection of impossible stage directions drawn from works by such playwrights as Eugene O'Neill Philip Glass Caryl Churchill Sarah Kane and Alistair McDowall Placing theatre history and performance analysis in such a context Performing the Unstageable values what is not possible and investigates the tricky underside of theatre's most fundamental function to bring things to the place of showing the stage

Khazam Stefan Kristensen Erin Manning John Miers Elfie Miklautz Marc Ngui Andreia Oliveira Federica Pallaver Andrej Radman Felix Rebolledo Anne Sauvagnargues Janae Sholtz Mhairi Vari Mick Wilson Elisabet Yanagisawa Pedagogies of Taking Care Dennis Atkinson, 2022-06-30 This book traces the notion of care and civic values in education that are largely devalued today by neoliberal economic concerns Through a discussion of educators and philosophers including Arendt Foucault Guattari Patocka Simondon Stengers and Whitehead Atkinson explores the gift of otherness in relation to an ethico politics of pedagogic practice and learning including art education He argues for pedagogical practices that facilitate and support each learner s pathways through what is called a pedagogy of taking care This involves paying due attention with empathy to each learner s pathway of learning and to the difference and divergence of such pathways It also requires the teacher to take care to be vigilant towards their own pedagogical frameworks that inform pedagogical work particularly when a student or child produces work that does not accord with such frameworks Atkinson not only critiques current educational policy but advocates possible futures of being not dominated by the neoliberal tools of force and power Pedagogies of taking care allow us to think differently about education and art education and reevaluate it s meaning within research classrooms non formal contexts of education and cultural institutions *The Medium of Contingency* 978-1-137-28654-3 Elie Ayache, 2016-06-15 In *The Medium of Contingency* Elie Ayache builds upon his ground breaking book *The Blank Swan* in exploring the intersection of philosophy and finance introducing new notions of price and market Inverting the received view he now sees a creation of matter in both the market and its metaphysics rather than pure speculation Once recognized as the proper medium of contingency and disassociated from the probabilistic and statistical tools traditionally used to model it the market can be thought as real in a new sense of reality corresponding to the new sense of matter To bring this new and original perspective *The Medium of Contingency* builds on probability theory as first formalized by von Mises and Kolmogorov and later revisited by Shafer and Vovk It utilises the author s extensive experience in derivatives pricing technology and software as well as his work in the philosophy of contingency and contingent claims to propose a new philosophical interpretation of Brownian motion and of the Black Scholes Merton formula Then it completes the overturning of the traditional view of the market by arguing that there should be no difference ultimately between an underlying asset and the derivative written on it This book does not aim to change the market but the way we must think of it It is the author s conviction that there can be no philosophy of the market and consequently no thinking of it without a philosophy of contingent claims and of derivative pricing The book provides the missing piece which the philosophy of probability cannot provide alone Its scope however extends beyond the strict critique of financial mathematics as it also and perhaps most importantly delivers the author s definitive treatment of the philosophically prominent and recently much discussed notion of contingency **The Space of Technicity** Robert Gorny, Stavros Kousoulas, Dulmini Perera, Andrej Radman, 2024-04-15 Desperate times demand optimistic transdisciplinary measures This volume unites a select group of

thinkers who courageously traverse disciplinary boundaries What brings them together is the least stratified component a shared problem It is a widely recognised that a problem gets the solution it merits However only a few acknowledge that a problem seldom neatly fits within a single discipline nor does it conform to the principle of general equivalence Handling its irreducibility and non entailment is a skill possessed by very few Even fewer take the quasi causal capacity of what we term the space of technicity seriously The space of technicity the shared problem of this volume is a consequence of immanence Each configuration of surfaces comprising the built environment produces an intangible effect acting as a quasi cause It can be referred to as downward causation or the timely rediscovery of neo finalism In this volume it is approached it from the perspective of axiology The space of technicity allows us to evade techno determinism without adopting an anything goes attitude That which has become manifest could have individuated differently However the potential of a body cannot be discerned before intervening in the causal fabric of agential reality to extract the singular points that make certain outcomes more likely than others surpassing mere probability When operating within the ethico aesthetic paradigm where sense becomes intricately dependent on sensibility and vice versa the volume s attitude might be said to approximate the Spinozian third kind of knowledge that intuits design and its space of technicity beyond mere imagination or reason This edited volume was inspired by a virtual round table that exhibited a high degree of resonance among the participants www.youtube.com/watch?v=cBiBAGxC5FM

Parenting/Internet/Kids: Domesticating Technologies Fiona Joy Green,Jaqueline McLeod Rogers,2022-07-07 Parenting Internet Kids with three key terms slashed together conveys the idea that the practice of parenting may extend both to the Internet and to our children to the extent that both require attention care and forms of regulation and in turn provide support and enjoyment While the triadic title is somewhat playful it also strikes a serious note and introduces layered possibilities we are not simply raising children who have grown up in the internet age but also Domesticating Technologies by managing the computer relatively young in age too having established itself in homes in the 1980s Including perspectives from scholars and parents living in Australia Canada India Japan the UK and the USA the collection examines how the intimate presence of computer technology in our homes and on our bodies affects not only mothers and parenting but family life more broadly

Virtual Images Lars C. Grabbe,Patrick Rupert-Kruse,Norbert M. Schmitz,2021-12-08 Common boundaries between the physical reality and rising digital media technologies are fading The age of hyper reality becomes an age of hyper aesthetics Immersive media as well as image technologies like virtual reality enable a completely novel form of interaction and corporeal relation to and with the virtual image structures VR Images contributes to the wide range of the hyper aesthetic image discourse to connect the concept of dynamic virtual images with the approaches in modern media theory philosophy perceptual theory aesthetics computer graphics art history and techno art as well as the complex range of image science Shared goal is a critical discussion of the specific epistemology of aesthetic and scientific approaches to VR This volume discusses the relation of images and technological evolution in the context of

virtual reality within the perspective of an autonomous image science

Deleuze and the Schizoanalysis of Literature

Ian Buchanan, Tim Matts, Aidan Tynan, 2015-02-26 In 1972 the French theorists Deleuze and Guattari unleashed their collaborative project which they termed schizoanalysis upon the world. Today few disciplines in the humanities and social sciences have been left untouched by its influence. Through a series of groundbreaking applications of Deleuze and Guattari's work to a diverse range of literary contexts from Shakespeare to science fiction, this collection demonstrates how schizoanalysis has transformed and is transforming literary scholarship. Intended for upper level undergraduates, postgraduates and scholars with an interest in continental philosophy, literary theory and critical and cultural theory, *Deleuze and the Schizoanalysis of Literature* is a cutting edge volume featuring some of the most original voices in the field setting the agenda for future research.

Radio und Schizophrenie Ferdinand Klüsener, 2024-12-14 In diesem Buch wird eine umfassende Radiotheorie der Schizoanalyse formuliert, die auf wenig erforschten Texten, Praktiken und Archivmaterial basiert. Im Mittelpunkt steht die Relevanz der Schizoanalyse für den ästhetischen Diskurs des 20. Jahrhunderts, insbesondere im Kontext der Radiokunst. Der Autor untersucht die Positionierung dieser Theorie zwischen Theater und Medienwissenschaften und analysiert deren Beziehung zur Geschichte und Ästhetik des Radios. Durch die Verbindung des mikropolitischen Gestenbegriffs von Deleuze und Guattari mit Konzepten des Gestischen aus dem Lehrstück und deren Verortung in einer Phänomenologie der Zeit jenseits des Tragischen wird ein neuer theoretischer Rahmen geschaffen. Zudem werden bisher unbekannte auditive Objekte für die Historisierung und Kanonisierung der Radiotheorie entdeckt. Methodisch stützt sich die Arbeit auf Performanceanalyse, Medienarchivologie und Interviews mit Akteuren des Feldes. Das Buch leistet einen entscheidenden Beitrag zur Erforschung eines weitgehend unerforschten, aber zentral historisch relevanten Themas und definiert neue theoretische Konzepte für Theorie und Praxis.

Duchamp, Aesthetics and Capitalism

Julian Jason Haladyn, 2019-07-12 This book is a significant rethinking of Duchamp's importance in the twenty-first century, taking seriously the readymade as a critical exploration of object-oriented relations under the conditions of consumer capitalism. The readymade is understood as an act of accelerating art as a discourse of pushing to the point of excess, the philosophical precepts of modern aesthetics on which the notion of art in modernity is based. Julian Haladyn argues for an accelerated Duchamp that speaks to a contemporary condition of art within our era of globalized capitalist production.

Egress Matt Colquhoun, 2020-03-10 *Egress* is the first book to consider the legacy and work of the writer, cultural critic and cult academic Mark Fisher. Narrated in orbit of his death as experienced by a community of friends and students in 2017, it analyses Fisher's philosophical trajectory from his days as a PhD student at the University of Warwick to the development of his unfinished book on Acid Communism. Taking the word *egress* as its starting point, a word used by Fisher in his book *The Weird and the Eerie* to describe an escape from present circumstances as experienced by the characters in countless examples of weird fiction, *Egress* considers the politics of death and community in a way that is indebted to Fisher's own forms of cultural
