*Peripheral Nerve Regeneration* Giovanna Gambarotta, Kirsten Haastert-Talini, Esther Udina, Stefania Raimondo, James Phillips, 2019-12-24     *A Dictionary of Real Numbers* Jonathan Borwein, 2012-12-06 How do we recognize that the number 93371663 is actually  $2 \log_{10} e$ ? Gauss observed that the number 1 85407467 is essentially a rational value of an elliptic integral an observation that was critical in the development of nineteenth century analysis How do we decide that such a number is actually a special value of a familiar function without the tools Gauss had at his disposal which were presumably phenomenal insight and a prodigious memory Part of the answer we hope lies in this volume This book is structured like a reverse telephone book or more accurately like a reverse handbook of special function values It is a list of just over 100 000 eight digit real numbers in the interval 0 1 that arise as the first eight digits of special values of familiar functions It is designed for people like ourselves who encounter various numbers computationally and want to know if these numbers have some simple form This is not a particularly well defined endeavor every eight digit number is rational and this is not interesting However the chances of an eight digit number agreeing with a small rational say with numerator and denominator less than twenty five is small Thus the list is comprised primarily of special function evaluations at various algebraic and simple transcendental values The exact numbers included are described below Each entry consists of the first eight digits after the decimal point of the number in question     **Advances in Treatment of Recurrent and Metastatic Nasal-Cranial Base Tumors** Yumin Wang, Weihong Jiang, Xiaobiao Zhang, Li Lan, 2022-05-03     **Banana Production in Venezuela** Barlin Orlando Olivares Campos, 2023-07-12 This book presents an important contribution to the knowledge of the banana soils of Venezuela Banana the edible fruit of Musaceae is a staple food for more than 400 million people worldwide due to their nutritional and energy attributes This makes Musaceae a crop of worldwide relevance particularly in tropical regions highlighting the impact of improved Musaceae cropping systems in the current efforts worldwide oriented towards a new agricultural revolution based on sustainable intensification To achieve this better practices for food production based on scientific and technical research capable to consider the complexity and variability within the agri food sector are necessary The research presented in this book is oriented towards providing answers to the causes of two aspects considered of high relevance for banana production both affecting productivity and sustainability always addressed for the Venezuelan conditions one of the world's largest producing countries 1 The impact of phytosanitary risks related to Fusarium Wilt FW and the influence of the soil on the incidence of Banana Wilt BW and 2 An observed trend towards loss of productivity and decline of soil quality in some commercial farms of Aragua and Trujillo states in Venezuela The book presents a pioneering study in the application of categorical regression CATREG in the characterization of banana soils and analyses soil morphological variables such as texture dry consistency biological activity reaction to HCl and type of structure to characterize soil productivity for growing healthy bananas It develops for the first time in Venezuela risk analysis and

**Nyamnjoh: Incompleteness: Donald Trump, Populism a** ,2023-01-10 This is a study of how Donald J Trump his populist credentials notwithstanding borrows without acknowledgment and stubbornly refuses to come to terms with his indebtedness Taken together with mobility and conviviality the principle of incompleteness enables us to distinguish between inclusionary and exclusionary forms of populism and when it is fuelled by ambitions of superiority and zero sum games of conquest Nyamnjoh challenges the reader to reflect on how stifling frameworks of citizenship and belonging predicated upon hierarchies of humanity and mobility and driven by a burning but elusive quest for completeness can be constructively transcended by humility and conviviality inspired by taking incompleteness seriously Nyamnjoh argues that

the logic and practice of incompleteness is a healthy antidote to name calling and scapegoating others as undesirable outsiders depending on the brand of populism at play Recognising incompleteness also helps to question sterile and problematic binaries such as those between elites and the impoverished masses among whom populists go to fish for political visibility prominence and success
