Kevin Story, 2020-06-09 This book traces the development of John Hejduk's architectural career using the idea of exorcism to uncover his thought process when examining architectural designs His work encouraged profound questioning on what why and how we build which allowed for more open discourse and enhance the phenomenology found in architectural experiences Three distinct eras in his architectural career are applied to analogies of outlines apparitions and angels throughout the book across seven chapters Using these thematic examples the author investigates the progression of thought and depth inside the architect's imagination by studying key projects such as the Texas houses Wall House Architectural Masques and his final works Featuring comments by Gloria Fiorenzino Hejduk Stanley Tigerman Steven Holl Zaha Hadid Charles Jencks Phyllis Lambert Juhani Pallasmaa Toshiko Mori and others this book brings to life the intricacies in the mind of John Hejduk and would be beneficial for those interested in architecture and design in the 20th century      **A Fractal Epistemology for a Scientific Psychology** Terry Marks-Tarlow, Yakov Shapiro, Katthe P. Wolf, Harris L. Friedman, 2020-01-06 Fractal dynamics provide an unparalleled tool for understanding the evolution of natural complexity throughout physical biological and psychological realms This book's conceptual framework helps to reconcile several persistent dichotomies in the natural sciences including mind brain linear nonlinear subjective objective and even personal transpersonal processes A fractal approach is especially useful when applied to recursive processes of consciousness both within their ordinary and anomalous manifestations This novel way to study the interconnection of seemingly divided wholes encompasses multiple dimensions of experience and being It brings together experts in diverse fields neuropsychologists psychiatrists physicists physiologists psychoanalysts mathematicians and professors of religion and music composition to demonstrate the value of fractals as model method and metaphor within psychology and related social and physical sciences The result is a new perspective for understanding what has often been dismissed as too subjective idiosyncratic and ineffably beyond the scope of science bringing these areas back into a natural scientific framework      **The Temple of Jerusalem** John M. Lundquist, 2007-12-30 As war and terrorism continue to rage over the Holy Land the Temple of Jerusalem arguably the most famous sacred structure in world history looms in the background as a symbol of past glory a place of religious worship and a site to be contended over and coveted This book offers a general history of the meaning importance and significance of the Temple of Jerusalem in both the religious and the political arena It begins with the construction of the Temple its destruction in 587 B C E its reconstruction in 516 B C E the vast enlargement during the time of the Idumean King Herod around 20 B C E its final destruction in 70 C E and its dynamic and abundant afterlife as the leading influence in the construction of Jewish synagogues Christian cathedrals and Islamic mosques But the Temple has also been at the center of much political and religious controversy and Lundquist explores the issues and conflicts that have erupted over this sacred place considers the meaning and importance of the Temple to Christianity Judaism and Islam from ancient times to the present and concludes with a careful consideration of the

continuing religious and political tensions On September 28 2000 Ariel Sharon visited the Temple Mount also called Al Haram As Sharif in Jerusalem igniting what has come to be known as the second intifada But why would such a visit to a religious site set off such a string of violent responses that continue to this day The answer lies in the history of the Temple of Jerusalem which once indeed twice stood in the spot known today as the Temple Mount to Jews and the Dome of the Rock to Muslims A holy place to three of the world's main religions Christianity Judaism and Islam the Temple of Jerusalem is arguably the most famous sacred structure in world history and figures prominently in Apocalyptic writings Yet it is almost entirely absent in all its phases from the archaeological record as the sacred nature of the site prohibits any excavation

O'Sullivan,A. Morrell,M. O'Connor,2016-04-30 Transformative learning involves experiencing a deep structural shift in the basic premises of thought feelings and actions It is a shift of consciousness that dramatically and permanently alters our way of being in the world Such a shift involves our understanding of ourselves and our self locations our relationships with other humans and with the natural world our understanding of relations of power in interlocking structures of class race and gender our body awarenesses our visions of alternative approaches to living and our sense of possibilities for social justice and peace and personal joy The editors of this collection make several challenges to the existing field of transformative learning the first is to theoreticians who have attempted to describe the nature of transformative learning without regard to the content of transformative learning The editors argue that transformative learning theory cannot be constructed in a content neutral or context free way Their second challenge which assumes the importance content for transformative learning is to educators as practitioners The editors argue that transformative learning requires new educational practices consistent with the content Arts based research and arts based teaching learning practices are one example of such new educational practices Education for the soul or spiritual practices such as meditation or modified martial arts or indigenous peoples forms of teaching learning is another example Each article in the collection presents a possible model of these new practices
