A Comprehensible Guide to J1939 Wilfried Voss, 2008 SAE J1939 has become the accepted industry standard and the vehicle network technology of choice for off highway machines This resource provides profound information on the J1939 message format and network management *Data Link Layer* Truck Bus Control and Communications Network Committee, 2022 The SAE J1939 documents are intended for light medium and heavy duty vehicles used on or off road as well as appropriate stationary applications which use vehicle derived components e g generator sets Vehicles of interest include but are not limited to on and off highway trucks and their trailers construction equipment and agricultural equipment and implements The purpose of these documents is to provide an open interconnect system for electronic systems It is the intention of these documents to allow Electronic Control Units to communicate with each other by providing a standard architecture This particular document SAE J1939 21 describes the data link layer using the Classical Extended Frame Format CEFF with 29 bit IDs as defined in ISO 11898 1 December 2015 For SAE J1939 no alternative data link layers are permitted This document has been revised to correct the value for Tr in Figure C1 *Recommended Practice for Pass-Thru Vehicle Programming* Vehicle E E System Diagnostic Standards Committee, 2002 This SAE Recommended Practice provides the framework to allow reprogramming software applications from all vehicle manufacturers the flexibility to work with multiple vehicle data link interface tools from multiple tool suppliers This system enables each vehicle manufacturer to control the programming sequence for electronic control units ECU s in their vehicles but allows a single set of programming hardware and vehicle interface to be used to program modules for all vehicle manufacturers This document does not limit the hardware possibilities for the connection between the PC used for the software application and the tool e g RS 232 RS 485 USB

Ethernet Tool suppliers are free to choose the hardware interface appropriate for their tool. The goal of this document is to ensure that reprogramming software from any vehicle manufacturer is compatible with hardware supplied by any tool manufacturer. The U.S. Environmental Protection Agency (EPA) and the California Air Resources Board (ARB) have proposed requirements for reprogramming vehicles for all manufacturers by the aftermarket repair industry. This document is intended to meet those proposed requirements for 2004 model year vehicles. Additional requirements for the 2005 model year may require revision of this document, most notably the inclusion of SAE J1939 for some heavy duty vehicles. This document will be reviewed for possible revision after those regulations are finalized and requirements are better understood. Possible revisions include SAE J1939 specific software and an alternate vehicle connector, but the basic hardware of an SAE J2534 interface device is expected to remain unchanged.
