 existence over two million years of existence He uses biology anthropology and sociology to link our ancestors from millennia  
 past and tells a gripping tale of how different species of humankind at different times emerged developed and for some died  
 off and disappeared totally from the face of the earth He explains how language culture and religion developed over  
 hundreds of thousands of year even with the biological constants dictated by nature He offers compelling arguments on what  
 made humans superior to other animals beyond just being able to walk upright and deftly use opposable thumbs Harari in his  
 sweeping tale of birth survival and death categorically assumes the forces expounded in the evolutionary theories of Darwin
