## **Desert Crossing:**

**3000 AD** Jon Fleetwood, 2001-01-28 The year is 3000 AD In 2720 man's failed social system had destroyed civilization forcing the remaining humans to begin again A new social system was adopted that embarked man on the unforeseen path to the Apocalypse Excerpt from 5th page of Chapter 18 The Horsemen approached Jared and Destiny with unimaginable speed Scant yards away their horses stopped and reared with anger flashing across their eyes as Gabriel stepped forward forbidding their passage Gabriel stood in front of them defiantly a shining white star standing against thunderous clouds of fire Gabriel seemed so small and fragile yet Destiny could feel the power surging from him in waves that could be released to instantly subdue the Horsemen if the need arose The horses stamped and snorted impatiently as the Horsemen looked at Gabriel at the humans and then looked up to the heavens The Horsemen paused and raised their swords to the sky as blood red fire erupted from the edges of their blades

**Bird Migration** Eberhard Gwinner, 2012-12-06 E GWINNER The phenomenon of bird migration with its large scale dimensions has attracted the attention of naturalists for centuries Worldwide billions of birds leave their breeding grounds every autumn to migrate to areas with seasonally more favorable conditions Many of these migrants travel only over a few hundred kilometers but others cover distances equivalent to the circumference of the earth Among these long distance migrants are several billion birds that invade Africa every autumn from their West and Central Palaearctic breeding areas In the Americas and in Asia the scope of bird migration is of a similar magnitude Just as impressive as the numbers of birds are their achievements They have to cope with the enormous energetic costs of long distance flying particularly while crossing oceans and deserts that do not allow replenishment of depleted fat reserves They have to appropriately time the onset and end of migrations both on a daily and annual basis And finally they have to orient their migratory movements in space to reach their species or population specific wintering and breeding grounds irrespective of the variable climatic conditions along their migratory routes
