It thus advances the scholarship on the scriptures relevance to past and present scientific paradigms reviewing multiple ancient cosmographical paradigms Egyptian Mesopotamian Hebraic Greek Christian Zoroastrian and Manichean as well as modern ones while being grounded in Islamic theology and philosophy of science. Constructing Professional Discourse Concepción Orna-Montesinos, 2012-01-17. This book explores the fascinating role that language plays in the construction of non-verbal objects by mapping out the ontological meaning of the specialised concepts and the domain-specific knowledge embedded in them. In doing so it provides a comprehensive linguistic insight into the discourse of professional domain-specific communities and hence into the communication practices and procedures of those communities. In this respect the book offers a response to the claims made by many of the most influential applied linguists today such as Vijay Bhatia 1993 2004 John Swales 1990 2004 or Ken Hyland 2002 among others who have consistently defended the need for applied linguistic research into the textual generic and social perspectives on the under-researched interrelatedness of the discursive and professional practices of a discipline. Specifically this book provides readers with an integrative multi-perspective approach to the study of professional domain-specific discourses. While it mainly draws on the tenets of genre theory and discourse semantics it also nurtures from the theoretical and empirical foundations of applied linguistics cognitive linguistics corpus linguistics and ontological engineering. The book starts from the analysis of domain-specific texts as final written products with specific lexicogrammatical semantic and rhetorical features to later enquire into the written products as textual artefacts closely linked to the social context of production and interpretation of the text. This integrative approach provides fresh new insights into the way the processes of writing are affected by the community-specific institutional and socio-historical circumstances in which domain-specific texts are produced.

Deconstructing the American Mosque Akel Ismail Kahera, 2008-10-01 From the avant garde design of the Islamic Cultural Center in New York City to the simplicity of the Dar al Islam Mosque in Abiquiu New Mexico the American mosque takes many forms of visual and architectural expression The absence of a single authoritative model and the plurality of design nuances reflect the heterogeneity of the American Muslim community itself which embodies a whole spectrum of ethnic origins traditions and religious practices In this book Akel Ismail Kahera explores the history and theory of Muslim religious aesthetics in the United States since 1950 Using a notion of deconstruction based on the concepts of *jamal* beauty subject and object found in the writings of Ibn Arabi d 1240 he interprets the forms and meanings of several American mosques from across the country His analysis contributes to three debates within the formulation of a Muslim aesthetics in North America first over the meaning purpose and function of visual religious expression second over the spatial and visual affinities between American and non American mosques including the Prophet s mosque at Madinah Arabia and third over the relevance of culture place and identity to the making of contemporary religious expression in North America *Muslims on the Americanization Path?* Yvonne Yazbeck Haddad, John L. Esposito, 2000-05-11 Islam is the fastest growing religion in the United States There are more Muslims in America than in Kuwait Qatar and Libya together Leaving aside immigration and conversion birthrate alone ensures that in the first part of the twenty first century Islam will replace Judaism as the nation s second largest religion Like all religious minorities in America Muslims must confront a host of difficult questions concerning faith and national identity Can they become part of a pluralistic American society without sacrificing their identity Can Muslims be Muslims in a state that is not governed by Islamic law Will the American legal system protect Muslim religious and cultural differences Is there a contradiction between demanding equal rights and insisting on maintaining a distinctively separate identity Will the secular and or Judeo Christian values of American society inhibit the Muslim practice of religious

faith While the Muslims of America are indeed on the path to Americanization what that means and what that will yield remains uncertain In this thoughtful and wide ranging volume fourteen distinguished scholars take an in depth look at these issues and examine the varied responses and opinions of the Muslim community *Encyclopedia of Religion in America*
