

Secured By Design (SBD) New Schools 2014 Application & Checklist

Secured by Design (SBD) is a minimum standard for security. Applicants should make themselves familiar with the relevant sections of the website www.securedbydesign.com and consult their local Crime Prevention Design Adviser (CPDA) for site specific information and follow the application process outlined below. Please note that the CPDA is sometimes referred to as the Architectural Liaison Officer (ALO) or Designing Out Crime Officer (DOCO).

You are strongly advised to contact the local CPDA to discuss the development before completing this application checklist, submitting a planning application or completing a Design and Access Statement.

The checklist element of this application is a guide only and does not reference all of the requirements and recommendations of SBD Schools. Also, in many cases, the final requirements for achieving SBD certification for the school will not be known until you have met with the CPDA. Therefore this application **MUST** be read in conjunction with the full SBD Schools document and a meeting arranged with the CPDA. The bracketed numbers refer to some of the clauses and sub clauses in the SBD Schools document.

Should the local planning authority require Secured by Design certification under a planning condition then the development must meet the full requirements of both sections 1 and 2 of the SBD Schools guidance document.

Developers wishing to market this school development as "Secured by Design" may only do so if compliance with both sections 1 and 2 of the SBD Schools guidance document has been achieved or a Secured by Design Pre-Build Agreement has been completed. Should you wish to enter into an SBD Pre-Build Agreement please notify the CPDA who will in turn contact the relevant Secured by Design Development Officer for your area.

Please tick the appropriate boxes to indicate compliance, *but note that additional or alternative measures, which are subject to the local crime risks, may be required by the CPDA.* These alternative and additional measures will be notified to you in writing. Please also note that unless you are informed otherwise by the CPDA in writing you will be expected to achieve all of the applicable requirements as outlined in the SBD Schools document.

Without first gaining advice, opportunities for designing out crime have often been lost by the time a development scheme has gained planning permission. Applicants should be aware that whilst late applications for Secured by Design may be considered by the CPDA, the development may not meet the requirements of SBD if the design, layout or specification is unsatisfactory.

Goswami, Frank Kreith, 2015-09-09 For the Movers Shakers and Policy Makers in Energy Engineering and Related Industries The latest version of a bestselling reference Energy Efficiency and Renewable Energy Handbook Second Edition covers the foremost trends and technologies in energy engineering today This new edition contains the latest material on energy planning and policy with Photovoltaic Thermal Passive House System Gopal Nath Tiwari, Neha Gupta, 2022-07-22 Sustainable Advanced Solar Passive House provides a platform to disseminate knowledge regarding the basics of solar energy heat transfer and solar houses including designing concepts Apart from a brief introduction to solar physics and thermodynamics the book primarily deals with the technical description of solar houses and associated concepts

Different types of photovoltaic modules and their integration with the buildings are discussed with case studies including energy balance equations and fundamental energy matrices. It discusses concepts like energy matrices, solar passive heating, cooling, architecture design, low cost building, energy exergy analysis, building integrated photovoltaic and energy conservation. *Lighting Controls Handbook* Craig DiLouie, 2020-11-26. Intended for energy managers, electrical engineers, building managers, lighting designers, consultants, and other electrical professionals, this book provides a practical description of major lighting controls types and how to apply them. It's a comprehensive step by step educational tour of lighting automation technology and its practical design and application with useful discussion about the purpose and benefits of lighting controls, emphasizing the achieving of relevant energy savings as well as support of occupant visual needs and preferences. The book shows readers how to take advantage of the many benefits of today's sophisticated controls including expanded energy saving opportunities and increased flexibility, reliability, and interoperability. **IES Design**

Considerations for Effective Building Lighting Energy Utilization Illuminating Engineering Society of North America, 1987. *Passive Solar Architecture* David Bainbridge, Ken Haggard, 2011-08-18. New buildings can be designed to be solar oriented, naturally heated and cooled, naturally lit and ventilated, and made with renewable, sustainable materials, no matter the location or climate. In this comprehensive overview of passive solar design, two of America's solar pioneers give homeowners, architects, designers, and builders the keys to successfully harnessing the sun and maximizing climate resources for heating, cooling, ventilation, and daylighting. Bainbridge and Haggard draw upon examples from their own experiences as well as those of others of more than three decades to offer both overarching principles as well as the details and formulas needed to successfully design a more comfortable, healthy, and secure place in which to live, laugh, dance, and be comfortable. Even if the power goes off, *Passive Solar Architecture* also discusses greener and more sustainable building materials and how to use them, and explores the historical roots of green design that have made possible buildings that produce more energy and other resources than they use. **Energy Research Abstracts**, 1995. **Lighting Redesign for Existing Buildings** Craig DiLouie, 2020-12-18. In *Lighting Redesign for Existing Buildings*, veteran journalist and educator Craig DiLouie identifies opportunities to both save energy and improve lighting performance in existing buildings. The book outlines the decision making process behind whether to retrofit or redesign an existing lighting system, describes basic lighting design techniques, and how to evaluate lighting equipment details, lighting legislation, and energy codes. It identifies advanced lighting strategies and describes the role planned maintenance can play in saving energy and ensuring long term performance. Readers will gain in depth insight into assessing and capturing their opportunities with better lighting. ASHRAE GreenGuide David L. The document provides information for those involved in the development of retrofit products or involved in the decision-making process of a retrofit project, such as buildings owners, authorities, designers and consultants, as well as the lighting and facade industry. This source book addresses both electric lighting solutions and daylighting solutions and offers a method to compare these retrofit solutions on a common basis, including a wide range of quality criteria of cost-related and lighting quality aspects. Simple retrofits such as replacing a lamp or adding interior blinds are widely accepted, often applied because of their low initial costs or short payback periods. The work presented in this report aims at promoting state-of-the-art and new lighting retrofit approaches that might cost more but offer a further reduction of energy consumption while improving lighting quality to a greater extent. *Energieeffiziente Beleuchtung ist eine der effektivsten Möglichkeiten Energie zu sparen*
