1865 this time using hard scientific facts The first movie showing a trip to the moon was made by Georges Méliès in 1902 In the comics format Hergé had Tintin walk on the moon in 1954 15 years before Neil Armstrong These are just a few of the many unique French contributions to SF that rightly deserve to be better known One of the purposes of this collection is to introduce French SF to an English speaking audience Rediscovering French Science Fiction first revisits proto science fiction from authors like Cyrano de Bergerac and Jules Verne before delving into contemporary science fiction works from authors such as Ren Barjavel and Jacques Spitz A contribution from preeminent SF author Elisabeth Vonarburg from Québec helps to understand the constraints and advantages of writing SF in French A third section is devoted to French SF in movies and graphic novels media where French creators have been recognized worldwide This collection explores many aspects of French SF including the genre's deep roots in popular culture the influence of key authors on its historical development and the form and function of science and fantasy as well as the impact of films and graphic novels on the public perception of the genre's nature

**Religion, Magic, and Science in Early Modern Europe and America** Allison P. Coudert, 2011-10-17 This fascinating study looks at how the seemingly incompatible forces of science magic and religion came together in the 15th 16th and 17th centuries to form the foundations of modern culture As Religion Magic and Science in Early Modern Europe and America makes clear the early modern period was one of stark contrasts witch burnings and the brilliant mathematical physics of Isaac Newton John Locke's plea for tolerance and the palpable lack of it the richness of intellectual and artistic life and the poverty of material existence for all but a tiny percentage of the population Yet for all the poverty insecurity and superstition the period produced a stunning galaxy of writers artists philosophers and scientists This book looks at the conditions that fomented the emergence of such outstanding talent innovation and invention in the period 1450 to 1800 It examines the interaction between religion magic and science during that time the impossibility of clearly differentiating between the three and the impact of these forces on the geniuses who laid the foundation for modern science and culture
