

Discourse Analysis for Language Teachers

DOUGLAS A. DEMO, CENTER FOR APPLIED LINGUISTICS

What Is Discourse Analysis?

Discourse analysis is the examination of language use by members of a speech community. It involves looking at both language form and language function and includes the study of both spoken interaction and written texts. It identifies linguistic features that characterize different genres as well as social and cultural factors that aid in our interpretation and understanding of different texts and types of talk. A discourse analysis of written texts might include a study of topic development and cohesion across the sentences, while an analysis of spoken language might focus on these aspects plus turn-taking practices, opening and closing sequences of social encounters, or narrative structure.

The study of discourse has developed in a variety of disciplines—sociolinguistics, anthropology, sociology, and social psychology. Thus discourse analysis takes different theoretical perspectives and analytic approaches: speech act theory, interactional sociolinguistics, ethnography of communication, pragmatics, conversation analysis, and variation analysis (Schiffrin, 1994). Although each approach emphasizes different aspects of language use, they all view language as social interaction.

This digest focuses on the application of discourse analysis to second language teaching and learning. It provides examples of how teachers can improve their teaching practices by investigating actual language use both in and out of the classroom, and how students can learn language through exposure to different types of discourse. Detailed introductions to discourse analysis, with special attention to the needs and experiences of language teachers, can be found in Celce-Murcia and Olshtain (2000), Hatch (1992), McCarthy (1992), McCarthy and Carter (1994), and Riggensbach (1999).

Discourse Analysis and Second Language Teaching

Even with the most communicative approaches, the second language classroom is limited in its ability to develop learners' communicative competence in the target language. This is due to the restricted number of contact hours with the language; minimal opportunities for interacting with native speakers; and limited exposure to the variety of functions, genres, speech events, and discourse types that occur outside the classroom. Given the limited time available for students to practice the target language, teachers should maximize opportunities for student participation. Classroom research is one way for teachers to monitor both the quantity and quality of students' output. By following a four-part process of Record-View-Transcribe-Analyze, second language teachers can use discourse analytic techniques to investigate the interaction patterns in their classrooms and to see how these patterns promote or hinder opportunities for learners to practice the target language. This process allows language teachers to study their own teaching behavior—specifically, the frequency, distribution, and types of questions they use and their effect on students' responses.

Step One: Videotape a complete lesson. Be sure to capture all of your questions and the students' responses. (Opportuni-

nities to speak the target language are often created by teachers' questions.)

Step Two: Watch the videotape. As you watch it, think about the types of questions you asked. Look for recurring patterns in your questioning style and the impact it has on the students' responses.

Step Three: Transcribe the lesson. A transcript will make it easier to identify the types of questions in the data and to focus on specific questions and student responses.

Step Four: Analyze the videotape and transcript. Why did you ask each question? What type of question was it—open (e.g., "What points do you think the author was making in the chapter you read yesterday?") or closed (e.g., "Did you like the chapter?")? Was the question effective in terms of your goals for teaching and learning? What effect did your questions have on the students' opportunities to practice the target language? How did the students respond to different types of questions? Were you satisfied with their responses? Which questions elicited the most discussion from the students? Did the students ask any questions? Focusing on actual classroom interaction, teachers can investigate how one aspect of their teaching style affects students' opportunities for speaking the target language. They can then make changes that will allow students more practice with a wider variety of discourse types.

Teachers can also use this process of Record-View-Transcribe-Analyze to study communication patterns in different classroom activities, such as student-to-student interactions during a paired role-play task and during a small-group cooperative learning activity. Communicative activities are expected to promote interaction and to provide opportunities for students to engage in talk. Teachers are likely to discover that students produce different speech patterns in response to different tasks. For example, a map activity is likely to elicit a series of questions and answers among participants, whereas a picture narration task requires a monologue developed around a narrative format. Given that teachers use communicative tasks to evaluate learners' proficiency, a better understanding of the influence of specific activities on learner discourse will likely lead teachers to use a greater variety of tasks in order to gain a more comprehensive picture of students' abilities. By recording, transcribing, and analyzing students' discourse, teachers can gain insight into the effect of specific tasks on students' language production and, over time, on their language development.

A discourse analysis of classroom interactions can also shed light on cross-cultural linguistic patterns that may be leading to communication difficulties. For example, some speakers may engage in overlap, speaking while someone else is taking a turn-at-talk. For some linguistic groups, this discourse behavior can be interpreted as a signal of engagement and involvement; however, other speakers may view it as an interruption and imposition on their speaking rights. Teachers can use the Record-View-Transcribe-Analyze technique to study cross-cultural interactions in their classrooms, helping students identify different communication strategies and their potential for miscommunication.

Discourse Analysis For Language Teachers Mindset Technology:

Handbook of Language Teacher Education Zia Tajeddin, Thomas S.C. Farrell, 2025-07-02 This handbook synthesizes accumulated research evidence about the main areas of language teacher education. It systematically applies research synthesis to the field, providing coherent systematic insights into various aspects of language teacher education. Each chapter compares research conducted between 2010-2020 within a specialized area of teacher education. The chapters discuss the theoretical and research underpinnings of each area, describing the purposes, methods, and findings of the research, including the impacts of teacher education on teacher professional development and teaching effectiveness. The twenty-six chapters in this handbook address three main areas of teacher education: Teacher Variables, Teacher Professional Development, and Teacher Instructional Beliefs and Practices. Section One on teacher variables includes ten chapters focused on teacher reflective practice, identity, cognition, self-efficacy, beliefs, emotion, motivation, demotivation, and burnout, agency, autonomy, and nativeness/nonnativeness. Section Two includes five chapters on teacher professional development, namely good language teachers, preservice teacher mentoring, practicum in language teacher education, online language teacher education, and language teacher action research. Section Three consists of eleven chapters on teacher instructional beliefs and practices, which systematically review research on teacher beliefs and practices about English as an international language, teacher intercultural knowledge and beliefs, teacher curricular knowledge, TPACK of in-service teachers in language education, CLIL, language teacher education, EMI, language teacher education heritage, language teacher education translanguageing in language teacher education, language teacher classroom discourse and interaction, language assessment literacy for teachers and scaffolding, and language teachers. This handbook is an invaluable resource for teacher educators, student preservice teachers, inservice teachers, graduate students of Teaching English to Speakers of Other Languages (TESOL) and Applied Linguistics, and teacher education researchers. [Routledge Handbook of Technological Advances in Researching Language Learning](#) Karim Sadeghi, 2024-11-29 The Routledge Handbook of Technological Advances in Researching Language Learning is the first volume to bring together the extant scholarship on the nature and role of digital technology in conducting second language research. The Handbook showcases technological advances, including issues and considerations affecting research conduction in second language education. The contributions focus on the role of digital technology in researching second language education, second language acquisition, and applied linguistics. Contributions by both seasoned and junior scholars feature empirical studies and methodological and/or theoretical discussions of technological tools used or tools that can be used for conducting research into various aspects of second language learning and acquisition. This book will primarily appeal to academic specialists, practitioners, and professionals in the field of applied linguistics and second language education. The book will also be informative for scholars and professionals in disciplines such as educational technology and TESOL. **The Handbook of Technology and Second Language Teaching and Learning** Carol A.
