How Universities Can Help Create a Wiser World Nicholas Maxwell, 2014-03-18 In

order to make progress towards a better world we need to learn how to do it And for that we need institutions of learning rationally designed and devoted to helping us solve our global problems make progress towards a better world It is just this that we lack at present Our universities pursue knowledge They are neither designed nor devoted to helping humanity learn how to tackle global problems problems of living in more intelligent humane and effective ways That this book argues is the key disaster of our times the crisis behind all the others our failure to have developed our institutions of learning so that they are rationally organized to help us solve our problems of living above all our global problems Having universities devoted almost exclusively to the pursuit of knowledge is a recipe for disaster Scientific knowledge and technological know how have unquestionably brought great benefits to humanity But they have also made possible even caused our current global crises above all the impending crisis of global warming In this lucid and provocative book Nicholas Maxwell argues convincingly that we need urgently to bring about a revolution in universities round the world so that their basic aim becomes wisdom and not just knowledge

Post-Conflict Reconstruction Neil Ferguson, 2010-10-12 Violence and conflict are two of the greatest challenges the world will face in this millennium Indeed since the turn of the century it is estimated that approximately four million people have died as a result of armed conflict Ending these seemingly intractable conflicts is a priority for global stability However the signing of the peace accord or the ending of formal hostilities does not automatically bring a return to normality in these fractured societies In practice it is more likely that these fractured societies will face a period in the twilight between war and peace a time when the world turns its attention to new problems and seemingly more pressing matters leaving the country to struggle towards peace and a new social order The book s contributors deal with the challenges faced in creating the foundations for the development of a positive peace from a variety of multi disciplinary perspectives such as development studies politics psychoanalysis psychology sports

studies and neuroscience This breadth of perspectives offers innovative insights into the grey space between war and peace which is home to millions of people across the globe and explores interventions which aim to create the conditions for positive post conflict reconstruction

The Nested Games of Brexit Agnès Alexandre-Collier,Pauline Schnapper,Simon Usherwood,2022-06-01 This book offers a novel perspective on the UK s withdrawal from the European Union providing insights to the ways in that domestic concerns interact with European policy to produce sometimes counter intuitive outcomes The 2016 decision by the United Kingdom to withdraw from the European Union was a seminal one for both political parties in the UK This innovative volume considers the extent to which the interrelation between the national and the European arenas produced significant opportunities for reshaping political action The nesting of these two levels matters firstly in allowing for the mobilisation of domestic actors around European issues and secondly in explaining why seemingly unimportant or counter productive actions are taken The tensions this generated reached a critical juncture with the referendum a rupture that highlights the extent to which a nominally second order vote can have fundamental impacts on the first order s preferences Bringing together scholars from a wide range of approaches and covering various aspects of the Brexit process this book offers a significant contribution to improving our understanding of an event that will shape British and European politics for a generation The chapters in this book were originally published as a special issue of the Journal of Contemporary European Studies

Kolenda, 2021-10-26 The military expert and author of *Leadership* presents the most thoughtful analysis yet of America's recent conflicts and future challenges Gen Stanley A McChrystal Why have the major post 9 11 US military interventions turned into quagmires Despite huge power imbalances in America's favor capacity building efforts and tactical victories the wars in Afghanistan and Iraq turned intractable The US government's fixation on zero sum decisive victory in these conflicts is a key reason why these operations failed to achieve favorable and durable outcomes In *Zero Sum Victory* retired US Army colonel Christopher D Kolenda identifies three interrelated problems that have emerged from the government's insistence on zero sum victory First the US government has no way to measure successful outcomes other than a decisive military victory and thus selects strategies that overestimate the possibility of such an outcome Second the United States is slow to recognize modify or abandon losing strategies Third once the United States decides to withdraw bargaining asymmetries and disconnects in strategy undermine the prospects for a successful transition or negotiated outcome Relying on historic examples and personal experience Kolenda draws thought provoking and actionable conclusions about the utility of American military power in the contemporary world insights that serve as a starting point for future scholarship as well as for important national security reforms

Religion and Violence in South Asia John Hinnells, Richard King, 2007-01-24 Do religions justify and cause violence or are they more appropriately seen as forces for peace and tolerance Featuring contributions from international experts in the field this book explores the debate that has emerged in the context of secular modernity about whether religion is a primary cause of social division conflict and war or whether this is simply a distortion of the true significance of religion and that if properly followed it promotes peace harmony goodwill and social cohesion Focusing on how this debate is played out in the South Asian context the book engages with issues relating to religion and violence in both its classical and contemporary formations The collection is designed to look beyond the stereotypical images and idealized portrayals of the peaceful South Asian religious traditions especially Hindu Buddhist Jain and Sufi which can occlude their own violent histories and to analyze the diverse attitudes towards and manifestations of violence within the major religious traditions of South Asia Divided into three sections the book also discusses globalization and the theoretical

issues that inform contemporary discussions of the relationship between religion and violence *Web Journalism*::// Sean Tunney,2009-12-03 Provides an analytical account of the implications of interactive participation in the construction of media content This work seeks to critically assess Internet news production It is suitable for those engaged in the debate over Web reporting and citizen journalism **Convictions, Conflict, and Moral Reasoning** David J. McMillan,2021-12-14 The primary focus of this volume is to bring to the fore the contribution of McClendon and Smith's work on convictions and the application of that work in helping understand the processes of moral reasoning in the context of conflict Both were indebted to Zuurdeeg and their concept was incorporated in models of moral reasoning by Baptist scholars Glen Stassen and Parush Parushev The usefulness of the concept is critically evaluated The volume concludes with a case study on the conflict in Northern Ireland including the role of religion and the key issues raised in the referendum on the Belfast Agreement in 1998 It includes an examination of the contribution of four Christian groups in Northern Ireland who publicly engaged in this six week period of intense and passionate debate on the Agreement and the difficult issues it addressed as the focus for examining and testing the application of the model of moral reasoning On the basis of the case study is demonstrated that the concept of convictions can prove to be a helpful means of getting to the heart of what drives moral reasoning in contexts of conflict The purpose of this book is to issue a call to engage with critique and consider the importance and application of a much undervalued methodological approach to discerning the convictions that are the primary influencers of thought and action *International Journal of Maritime History* ,2005 **Ethos Clash in Israeli Society** Eyal Lewin,2013-12-18 The question of whether Israel is capable of coping with long term warfare has long haunted scholars of Israel studies This book tackles the question through a thorough analysis of the Israeli national ethos The national ethos of a people is the integrating element that defines a nation's identity and bonds it into a coherent social group However in the Israeli case two competing forms of national ethos threaten to tear society apart and weaken it a republican ethos that cherishes the national group and a liberal ethos that puts the individual above all In creating an account of Israel's ability to fight possible future wars this book carefully examines these two competing forms of national ethos that create an ideological dichotomy in Israel Each ethos has its reasoning its inherent logic its historic origins and theories of social science that can explain the background for its development This book offers a comprehensive analysis of each ethos that takes account of the environment setting and circumstances through which it ought to be understood The deep inquiry into the dynamics of Israel's national ethos enables a new comprehension of the wobbliness of Israeli politics and leads to certain conclusions about the fatal question that this book set out to find whether Israel will eventually survive its international struggles or perish **Building Peace in Northern Ireland** Maria Power,Maria Clemence Power,2011-01-01 Since the troubles began in the late 1960s people in Northern Ireland have been working together to bring about a peaceful end to the conflict Building Peace in Northern Ireland examines the different forms of peace and reconciliation work that have taken place Maria Power has brought

together an international group of scholars to examine initiatives such as integrated education faith based peace building cross border cooperation and women s activism as well as the impact that government policy and European funding have had upon the development of peace and reconciliation organizations

Ireland and the Reception of the Bible Bradford A. Anderson, Jonathan Kearney, 2018-04-19 Drawing on the work of leading figures in biblical religious historical and cultural studies in Ireland and beyond this volume explores the reception of the Bible in Ireland focusing on the social and cultural dimensions of such use of the Bible This includes the transmission of the Bible the Bible and identity formation engagement beyond Ireland and cultural and artistic appropriation of the Bible The chapters collected here are particularly useful and insightful for those researching the use and reception of the Bible as well as those with broader interests in social and cultural dimensions of Irish history and Irish studies The chapters challenge the perception in the minds of many that the Bible is a static book with a fixed place in the world that can be relegated to ecclesial contexts and perhaps academic study Rather as this book shows the role of the Bible in the world is much more complex Nowhere is this clearer than in Ireland with its rich and complex religious cultural and social history This volume examines these very issues highlighting the varied ways in which the Bible has impacted Irish life and society as well as the ways in which the cultural specificity of Ireland has impacted the use and development of the Bible both in Ireland and further afield

Inventing Tomorrow Sarah Cole, 2019-10-22 H G Wells played a central role in defining the intellectual political and literary character of the twentieth century A prolific literary innovator he coined such concepts as time machine war of the worlds and atomic bomb exerting vast influence on popular ideas of time and futurity progress and decline and humanity s place in the universe Wells was a public intellectual with a worldwide readership He met with world leaders including Roosevelt Lenin Stalin and Churchill and his books were international best sellers Yet critics and scholars have largely forgotten his accomplishments or relegated them to genre fiction overlooking their breadth and diversity In Inventing Tomorrow Sarah Cole provides a definitive account of Wells s work and ideas She contends that Wells casts new light on modernism and its values on topics from warfare to science to time his work resonates both thematically and aesthetically with some of the most ambitious modernists At the same time unlike many modernists Wells believed that literature had a pressing place in public life and his works reached a wide range of readers While recognizing Wells s limitations Cole offers a new account of his distinctive style as well as his interventions into social and political thought She illuminates how Wells embodies twentieth century literature at its most expansive and engaged An ambitious rethinking of Wells as both writer and thinker Inventing Tomorrow suggests that he offers a timely model for literature s moral responsibility to imagine a better global future
