The editors map out a vision for research on women and entrepreneurship and using a contextual framework that includes aspiration, behavior, and confidence. They delve into issues such as social identity, start-ups, crowdfunding, and context to set a new foundation for future research on entrepreneurship and gender.

Advances in Entrepreneurial Finance Rassoul Yazdipour, 2010-12-17. *Advances in Entrepreneurial Finance* brings together contributions from researchers from the fields of entrepreneurship, behavioral finance, psychology, and neuroscience to shed new light on the dynamics of decision making and risk taking by entrepreneurs and venture capitalists (VCs). Every new venture requires access to capital at competitive interest rates, and much has been written on general entrepreneurship by management scholars and financial contracting by financial economists using traditional finance theory with all its highly restrictive assumptions regarding decision makers' cognitive capabilities and behavior. But recent developments in behavioral finance can now be applied to understand how entrepreneurs and VCs perceive risk and uncertainty and how they decide and act accordingly. Showcasing the latest research, this volume demonstrates that findings from the behavioral and neuroscience arenas can and do explain decision making by entrepreneurs and venture investors in the real world. Consequently, such findings have practical implications not only for entrepreneurs, venture capitalists, and their advisors but also all government agencies and NGOs that want to support product and technological innovation, capital formation, job creation, and economic development.
