Offering an in depth exploration of the intricate interplay between theology ecology and social justice Facing Climate Collapse critically engages with the evolving discourse surrounding the Anthropocene and presents a compelling argument for rebranding this epoch as the capitalocene Collectively offering a rigorous examination of diverse theological perspectives including ecofeminist antiwar theology and a reimagining of salvation in the context of climate change the chapters in this book present perspectives on ecological justice indigenous wisdom and congregational ecclesiology in Southern Africa With contributions from various academic voices including many from the Global South this volume invites readers to engage with innovative concepts challenge established paradigms and explore fresh approaches to the pressing ecological issues of our era This book is part of a new series of volumes co published with the World Council of Mission s DARE Discernment And Radical Engagement programme

*Connection to Nature, Deep Ecology, and Conservation Social Science* Christian Diehm, 2020-12-15 In *Connection to Nature Deep Ecology and Conservation Social Science Human Nature Bonding and Protecting the Natural World* Christian Diehm analyzes the relevance of the philosophy of deep ecology to contemporary discussions of human nature connectedness Focusing on deep ecologists notion of identification with nature Diehm argues that deep ecological theory is less conceptually problematic than is sometimes thought and offers valuable insights into what a sense of connection to nature entails what its attitudinal and behavioral effects might be and how it might be nurtured and developed This book is closely informed by and engages at length with conservation social science which Diehm draws on to assess the claims of deep ecology theorists resolve long standing problems associated with their work investigate the impacts of time outdoors on human nature bonding and critically review the biophilia hypothesis Emphasizing the foundational role of ecologically inclusive identities in pro environmental attitudes and behaviors Diehm demonstrates that having a sense of connection to nature is more important than many environmental advocates have realized and that deep ecology has much to add to the increasingly pressing conversations about it
