

The background of the cover is a photograph of a person rappelling down a dark, craggy rock face. The person is wearing a red long-sleeved shirt, black pants, and a green helmet. They are holding a rope and have a blue backpack. The scene is set against a bright orange and yellow sunset sky. The title 'Essentials of Anatomy & Physiology' is overlaid on the top half of the image.

Mosby's Essential Sciences for Therapeutic Massage - E-Book Sandy Fritz, 2012-04-16. The fourth edition of this science essentials text for massage students features new full-color photos and illustrations along with an easy-to-read conversational style that explains A&P concepts clearly. The book not only helps students learn the information they need to pass certification exams but it also helps them see how scientific content applies to actual practice. This new edition also features a very enhanced Evolve resource package along with new material on boosting your knowledge of nutrition and research, two subjects of growing interest in the massage therapy profession. Clinical reasoning activities included in the workbook section for each chapter promote problem-based learning. Format combining workbook and textbook features gives you immediate review tools in the form of matching exercises, short-answer questions, fill-in-the-blank questions, drawing exercises, and critical thinking questions. Sections on pathologic conditions feature intervention protocols as well as indications and contraindications for therapeutic massage. Expert author Sandy Fritz provides credibility and authority to the information presented. Practical Applications boxes in each chapter enable you to see the way material applies to real practice and supports competency-based learning. Highly illustrated format features over 700 full-color line drawings and photos. Updated chapters and artwork have all been revised to reflect the most current industry information and reviewer feedback. MTBOK mapping for instructors on the Evolve website includes a mapping document that links the student objectives in the book to the components of the MTBOK. New muscle illustrations in Chapter 9 clearly show attachments and actions as well as the relationships between different muscles in composite drawings. Coverage of nutrition now in Chapter 12 includes information on the digestive process, basics of solid nutrition, how vitamins and minerals affect the body, and how proper nutrition affects the functions of all systems of the body. Enhanced pathology and indications/contraindications appendix includes more illustrations to increase your understanding of what you may encounter during practice. Improved biomechanics chapter activities that use photos instead of drawings help you better understand and apply
