Estimation Of Panel Vector Autoregression In Stata A:

Estimation of Panel Vector Autoregression in Stata, 2016 Macroeconomic Policy Framework for Africa's Structural Transformation Carlos Lopes, Abdalla Hamdok, Adam Elhiraika, 2017-08-11 The main objective of this book is to identify the key sources of growth which have played a significant role in Africa's recent robust growth as well as its efforts towards economic transformation. The book assesses to what extent the existing macroeconomic frameworks among African countries have been streamlined to the countries' development priorities in order to achieve long term growth and economic transformation. Taking into account the diversity of African countries, the authors establish the economic linkages between relevant macroeconomic policy variables and the key sources of growth and development among the selected African economies based on both theoretical and empirical underpinnings. Following this, an outline of a macroeconomic framework for Africa's long term growth and economic transformation is suggested. **New Perspectives in the Public and Cultural Sectors**

Calogero Guccio, Isidoro Mazza, Giacomo Pignataro, 2025-06-10 This book presents a unique collection of contributions on modern topics in applied public economics written by leading experts in the respective disciplines and their intersections from cultural economics to public choice. It features contributions on fundamental methodological and empirical issues regarding the role and effects of public intervention in a broad range of fields such as cultural heritage, creative industries, regulation, public procurement, corruption, tax evasion, health economics, and public goods. The book was written in honor of Ilde Rizzo on the occasion of her retirement for her many contributions to applied public economics. Given its scope, it will appeal to researchers and PhD students who are interested in the latest developments in cultural and public economics.

Good Governance and Economic Growth Ramesh Chandra Das, 2024-09-16 Governance has been incorporated into the development models of many countries because of its role in ameliorating inequalities in society. This book explores whether good governance boosts or hinders economic growth with perspectives from countries like India, the USA, Nigeria, Turkey, Pakistan, Bangladesh, Nepal, and others, and on groups of developing nations like BRICS and ASEAN. Governance has twin roles within economic systems: The first is where it guides administrators, and the second is the normative role where it may act as a stimulus to economic growth and development. With the help of empirical investigations, this book analyses the interrelationships between good governance and inclusive and sustainable economic growth, productive employment, political stability, and decent work for all. It assesses the impact of various governance indicators and policy strategies on the economy and the GDP of countries in the Global North and South. The book also focuses on roadblocks to good governance such as violent conflicts, corruption, international threats, and crises and its implication on economic growth. This volume will be of interest to students and researchers of economics, political science, social science, international relations, public administration, and sociology. **Regional Disparities and Fiscal Federalism in Russia** Oksana Dynnikova, 2021-05-20 This paper examines how regional disparities have evolved in Russia and how Russia's system of intergovernmental fiscal relations is

managing these disparities Regional disparities have fallen over the past two decades but remain relatively high Socioeconomic outcomes remain worse in lagging regions despite faster growth and convergence in income levels The twin shocks of COVID 19 and lower oil prices appear to have impacted richer regions disproportionately Compared to other large countries with federal systems of government Russia stands out with its high reliance on direct taxes as a revenue source for its regions Transfers from the federal budget to the regions provide some redistribution by reducing the dispersion in real per capita fiscal spending but also tend to be associated with lower growth The Russian fiscal system offers degrees of redistribution and risk sharing of around 26 and 18 percent respectively with in kind social transfers contributing the most Finally federal transfers in the aggregate tend to be procyclical and are also fairly unresponsive to shocks to regions own revenues

Fiscal Implications of Government Wage Bill Spending Mr.Kamil Dybczak,Ms.Mercedes Garcia-Escribano,2019-01-15 This paper discusses the short and medium term fiscal implications of government wage bill spending Working with a sample of 137 advanced emerging and low income countries we use a panel VAR approach to identify differences in the dynamic behavior of revenues nonwage expenditures and the overall fiscal balance in response to changes in the wage bill We show that the interaction between wage bill changes and these three fiscal items is alike and varies overtime Higher wage bill spending does not revert in the medium term but the initial worsening of the fiscal balance associated with it though it persists eventually halves as revenues increase while non wage spending remains broadly unchanged We also show that countries differ in how these three fiscal variables behave following wage bill changes and seek to explain this variation by a set of country characteristics including the level of development access to natural resources and public indebtedness levels

The Extended Energy-Growth Nexus Jose Alberto Fuinhas,António Cardoso Marques,2019-06-08 The Extended Energy Growth Nexus Theory and Empirical Applications advances the established bivariate econometric relationship which inextricably links energy consumption to economic growth The book extends this nexus to accommodate variables such as globalization institutional variables financial variables and the energy mix Rooted firmly in the modern literature it covers empirical applications such as the evaluation of renewable energy incentives the electricity generation mix and sustainable development Each application area incorporates modern econometric methodologies including VAR panel VAR ARDL panel ARDL Asymmetric panel ARDL and Panel Quantile Regression Throughout chapters are accompanied by illustrative Stata and EViews code demonstrating their uses in applied research Primes researchers to understand advanced literature and current methodologies within the energy growth nexus Provides a rich set of working tools for econometricians working on real world energy and growth problems Accompanied by representative databases and illustrative Stata and EViews code facilitating replication and use

Econometrics in Theory and Practice Panchanan Das,2019-09-05 This book introduces econometric analysis of cross section time series and panel data with the application of statistical software It serves as a basic text for those who wish to learn and apply econometric analysis in empirical research The level of presentation is as simple as possible to make it useful for undergraduates as well as graduate students It contains several examples with real data and Stata programmes and interpretation of the results While discussing the statistical tools needed to understand empirical economic research the book attempts to provide a balance between

theory and applied research Various concepts and techniques of econometric analysis are supported by carefully developed examples with the use of statistical software package Stata 15.1 and assumes that the reader is somewhat familiar with the Stata software The topics covered in this book are divided into four parts Part I discusses introductory econometric methods for data analysis that economists and other social scientists use to estimate the economic and social relationships and to test hypotheses about them using real world data There are five chapters in this part covering the data management issues details of linear regression models the related problems due to violation of the classical assumptions Part II discusses some advanced topics used frequently in empirical research with cross section data In its three chapters this part includes some specific problems of regression analysis Part III deals with time series econometric analysis It covers intensively both the univariate and multivariate time series econometric models and their applications with software programming in six chapters Part IV takes care of panel data analysis in four chapters Different aspects of fixed effects and random effects are discussed here Panel data analysis has been extended by taking dynamic panel data models which are most suitable for macroeconomic research The book is invaluable for students and researchers of social sciences business management operations research engineering and applied mathematics

Empirical Estimation of Fiscal Multipliers in MENA Oil-Exporting Countries with an Application to Algeria Maria Elkhedari, Moez Souissi, Mr. Andrew Jewell, 2018-05-31 At a time when Algeria must undertake considerable fiscal consolidation to restore sustainability the issue of fiscal multipliers has come to the fore This paper estimates short term and long term fiscal multipliers for Algeria applying several econometric methodologies including Local Projection Methodology and Vector Autoregressive Models and using both Algeria specific and panel data The paper also explores asymmetries related to the sign of the output gap as well as the direction of spending The results suggest that i average fiscal multipliers for Algeria are generally moderate and below unity ii the impact of public spending shocks is more important when the output gap is negative iii fiscal spending multipliers are significantly larger during spending contraction than expansion iv procyclicality in public spending does not appear to affect output except for capital spending cuts when the output gap is negative and v while multipliers associated with countercyclical public spending can be sizeable a contraction in current spending does not materially affect non oil GDP
