The Post Cold War World Michael Cox, 2018-12-14. This book by a leading scholar of international relations examines the origins of the new world disorder: the resurgence of Russia, the rise of populism in the West, deep tensions in the Atlantic alliance and the new strategic partnership between China and Russia, and asks why so many assumptions about how the world might look after the Cold War liberal democratic and increasingly global have proven to be so wrong. To explain this, Michael Cox goes back to the moment of disintegration and examines what the Cold War was about, why the Cold War ended, why the experts failed to predict it, and how different writers and policy makers, and not just western ones, have viewed the tumultuous period between 1989 when the liberal order seemed on top of the world through to the current period when confidence in the western project seems to have disappeared almost completely.

Germany from Peace to Power? James D. Bindenagel, 2020-08-10. A surge of political trends and upheavals all over the world confronts German foreign policy with a world that is dramatically different from Berlin. Republic unification in 1990, Brexit, American decommitment to Europe and the rise of isolationist populist forces within Germany, as well as in other European countries, and the U.S. have undermined the foundations of Germany's foreign policy. Germany is suddenly faced with another historical shift that is starting to shake the bedrock of its foreign policy. A council of experts for strategic foresight can address Germany's strategic cultural deficit, its civilian power fixation, its resorts, principle of ministerial independence and its coalition governance conflicts.

A Union of Peoples Pavlos Eleftheriadis, 2020-04-23. Many political and legal philosophers compare the EU to a federal union and believe its basic laws should be subject to the standards of constitutional law and thus find it lacking or incomplete. This book proposes a rival theory that the substance of EU law is not constitutional but international and provides a close examination of the treaties and the precedents of the European courts to explore this concept further. Just like international law, EU law applies primarily to the relations between member states who have democratically chosen to adapt their constitutional arrangements in order to share legislative and executive powers with their partners. The legal architecture of the European Union is thus best understood under a theory of dualism and not pluralism. According to this internationalist view, EU law is part of the law of nations and its distinction from domestic law is a matter of substance, not form. This arrangement is supported by a cosmopolitan theory of international justice which we may call progressive internationalism. The EU is a union of democratic peoples freely organizing their interdependence on the basis of principles of equality and

reciprocity Its central principles are not the principles of a constitution but cosmopolitan principles of accountability liberty and fairness Presenting an internationalist reading this book proposes that the EU is a creation of the law of nations and argues for a dualist account of its legal architecture with EU law and domestic law allocated different institutional roles
