International Handbook of Educational Evaluation T. Kellaghan, D.L. Stufflebeam, 2012-12-06 Thomas Kellaghan Educational Research Centre St Patrick's College Dublin Ireland Daniel L Stufflebeam The Evaluation Center Western Michigan University MI USA Lori A Wingate The Evaluation Center Western Michigan University MI USA Educational evaluation encompasses a wide array of activities including student assessment, measurement, testing, program evaluation, school personnel evaluation, school accreditation and curriculum evaluation. It occurs at all levels of education systems from the individual student evaluations carried out by classroom teachers to evaluations of schools and districts to district-wide program evaluations to national assessments to cross-national comparisons of student achievement. As in any area of scholarship and practice, the field is constantly evolving as a result of advances in theory, methodology and technology, increasing globalization, emerging needs and pressures and cross-fertilization from other disciplines. The beginning of a new century would seem an appropriate time to provide a portrait of the current state of the theory and practice of educational evaluation across the globe. It is the purpose of this handbook to attempt to do this, to sketch the international landscape of educational evaluation, its conceptualizations, practice, methodology and background and the functions it serves. The book's 43 chapters, grouped in 10 sections, provide detailed accounts of major components of the educational evaluation enterprise. Together they provide a panoramic view of an evolving field.

Evaluación económica de medicamentos y tecnologías sanitarias: Javier Soto Álvarez, 2014-01-10 The ultimate purpose of this book on economic evaluation is to be a text for consultation and inspiration to anyone who wishes to design, carry out and analyse an economic evaluation of a drug or health technology in order to obtain valid and quality results and thus serve to make better health-related decisions in our country. Unfortunately, the resources available in our National Health System to cover all the healthcare needs of our society are ever more limited; therefore, it is absolutely necessary to prioritise the allocation of resources and to use these resources to finance the therapeutic options that are most efficacious, safe and cost-effective that will achieve the best health results in patients with the monetary investment carried out. Economic evaluations will be instruments of invaluable help for healthcare professionals and other decision-making agents of the system when it comes to making a more efficient use of existing resources, maximising the therapeutic benefit.
