Bioinformatics Zoé Lacroix,Terence Critchlow,2003-09-08 Life science data integration and interoperability is one of the most challenging problems facing bioinformatics today In the current age of the life sciences investigators have to interpret many types of information from a variety of sources lab instruments public databases gene expression profiles raw sequence

traces single nucleotide polymorphisms chemical screening data proteomic data putative metabolic pathway models and many others Unfortunately scientists are not currently able to easily identify and access this information because of the variety of semantics interfaces and data formats used by the underlying data sources Bioinformatics Managing Scientific Data tackles this challenge head on by discussing the current approaches and variety of systems available to help bioinformaticians with this increasingly complex issue The heart of the book lies in the collaboration efforts of eight distinct bioinformatics teams that describe their own unique approaches to data integration and interoperability Each system receives its own chapter where the lead contributors provide precious insight into the specific problems being addressed by the system why the particular architecture was chosen and details on the system s strengths and weaknesses In closing the editors provide important criteria for evaluating these systems that bioinformatics professionals will find valuable Provides a clear overview of the state of the art in data integration and interoperability in genomics highlighting a variety of systems and giving insight into the strengths and weaknesses of their different approaches Discusses shared vocabulary design issues complexity of use cases and the difficulties of transferring existing data management approaches to bioinformatics systems which serves to connect computer and life scientists Written by the primary contributors of eight reputable bioinformatics systems in academia and industry including BioKris TAMBIS K2 GeneExpress P FDM MBM SDSC SRS and DiscoveryLink
