Assessment and Intervention Issues Across the Life Span Stephanie M.C. Dollinger,Lisabeth F. DiLalla,Stephanie MC Dollinger,2013-06-17 This volume evolved from the second life span development conference held at Southern Illinois University entitled Assessment and Intervention Across the Lifespan Providing an overview and consideration of important directions for research in areas of assessment and intervention across the lifespan the presentations covered a variety of topic areas including social ecology cultural diversity attitudes about aging as well as attention visual and linguistic skills This volume consists of chapters based on the conference presentations as well as additional chapters by experts in related specialty areas discussing attachment theory learning disabilities and phonological processing The second conference and volume continue the work of the first conference and its associated earlier volume The chapters cover important interactions between assessment and intervention for each major developmental period several emphasize the importance of early assessment and intervention A common theme found throughout is the critical connection between basic research and practice The editors hope this book will prove useful not only to researchers but also to practitioners in related disciplines working with individuals of all ages *The New Corporation* Joel Bakan,2020-09-22 A deeply informed and unflinching look at the way corporations have slyly rebranded themselves as socially conscious entities ready to tackle society s problems while CEO compensation soars income inequality is at all time highs and democracy sits in a precarious situation A very important book an arresting study directed to a central issue of the times Noam Chomsky from the author of *The Corporation* *The Pathological Pursuit of Profit and Power* Over the last decade and a half business leaders have been calling for a new

kind of capitalism With income inequality soaring wages stagnating and a climate crisis escalating they realized that they had to make social and environmental values the very core of their messaging The problem is corporations are still first and foremost concerned with their bottom line In lucid and engaging prose Joel Bakan documents how increasing corporate freedom encroaches on individual liberty and democracy Through deep research and interviews with both top executives and their sharpest critics he exposes the inhumanity and destructive force of the current order profit driven privatization subverting the public good governments neglecting duties to protect the environment the increasing alienation we experience as every aspect of life is economized and how the Covid 19 pandemic lays bare the unjust fault lines of our corporate led society Beyond diagnosing major problems in *The New Corporation* Bakan narrates a hopeful path forward He reveals how citizens around the world are fighting back and making gains in ways that bolster democracy and benefit ordinary citizens rather than the corporate elite

Society in Question Robert J. Brym,1999 *Move First, Think Later* Willy Hendriks,2014-08-01 The chess playing mind does not work like a machine Selecting a move results from rather chaotic thought processes and is not the logical outcome of applying a rational method The only problem with that says International Master Willy Hendriks is that most books and courses on improving at chess claim exactly the opposite The dogma of the chess instruction establishment is that if you only take a good look at certain characteristics of a position then good moves will follow more or less automatically But this is not how it happens Chess players weak and strong don't first judge the position then formulate a plan and afterwards look at moves It all happens at the same time and pretending that it is otherwise is counterproductive There is no use in forcing your students to mentally jump through theoretical hoops according to experienced chess coach Hendriks This work shows a healthy distrust of accepted methods to get better at chess It teaches that winning games does not depend on ticking off a to do list when looking at a position on the board It presents club and internet chess players with loads of much needed no nonsense training material In this provocative entertaining and highly instructive book Hendriks shows how you can travel light on the road to chess improvement
