REPORTABLE INGREDIENTS LIST

The California Safe Cosmetics Act of 2005 requires cosmetic manufacturers to disclose to the California Department of Public Health (CDPH) all products containing ingredients known or suspected to cause cancer, birth defects, or other reproductive toxicity as determined by the authoritative scientific bodies cited in California Health and Safety Code Section 111761.5. These bodies are 1) the California Office of Environmental Health Hazard Assessment (Proposition 65 List of Chemicals Known to Cause Cancer or Reproductive Toxicity); 2) U.S. Environmental Protection Agency (U.S. EPA); 3) National Toxicology Program (NTP) Office of Health Assessment and Translation (OHAT) (formerly Center for the Evaluation of Risks to Human Reproduction (CERHR)); 4) NTP's Report on Carcinogens (RoC); and 5) the International Agency for Research on Cancer (IARC).

To assist companies with reporting, CDPH has compiled this list of reportable ingredients based on lists and reports available from these organizations. Please note that the authoritative bodies are continuously updating published information. For the most up-to-date guidance on reportable chemicals, please refer directly to the lists and reports available from these organizations.

Chemical Abstract Service (CAS) Registry Numbers and synonyms are provided for some of the listed chemicals. However, this guidance document is not all-inclusive. Manufacturers may still be required to report a chemical to CDPH even if a specific synonym or CAS number for an ingredient is not listed here.

Note to consumers: Not all of these chemicals are found in cosmetic products. Also, note that the likelihood of a cosmetic product leading to cancer or reproductive harm depends on many factors, including (but not limited to) the amount and type of exposure to chemicals in the product. The chemicals are listed here because of findings from research on the chemicals and not on cosmetic products.

Dividends Steve Kempster, Thomas Maak, Ken Parry, 2019-02-14 This book seeks to answer the question of leadership for what. We shall outline an answer by focusing on responsible leadership of purpose through an interdisciplinary perspective. Responsible leadership moves the axis of leadership from leader followers to leader stakeholders away from looking at leadership as person centric. The qualities, abilities and effectiveness of the leader to a focus on the purposes, responsibilities and activities of leadership. Leadership orientation is about realising value for a range of constituencies not just the shareholders of the business. In this way, this book offers up an alternative business model to that of dominant neo liberal approaches to capitalism and its flow on effect to the leadership project. This is a model that draws on a most obvious assumption: if leaders maximise the use of all the capitals of their business, they will maximise their dividends and thus deliver their responsibility to the shareholders as well as other relevant stakeholders. This book explores how five dividends based on five capitals can be developed through attention to a sixth dividend and sixth capital: the dividend from our planet and communities. The planetary dividend is the flourishing of humanity, but it is also a significant dividend to the business. For example, by engaging the business in a purpose led orientation to enhance the planetary dividend, the dividend from human resourcefulness becomes manifest: employee sense of purpose, commitment, passion and energy. The realisation of such can also connect with dividends from innovation, operations and brands. For example, the business benefits from a purpose driven brand. In short, responsible leadership of purpose outlines a case for leadership to focus on a connected portfolio of good dividends as an answer to the question: leadership for what? The book is written by academics and organisational leaders. It draws on a range of research with leaders from a variety of contexts to illustrate the challenges but also the benefits of this argument. It is an ambitious book, ambitious in terms of moving leadership towards realising purpose, ambitious by seeking to align a range of business disciplines around responsible leadership and ambitious because it challenges the dominant assumptions that shape business leadership. However, it is based on a simple question: why would a business not wish to generate good dividends for all its stakeholders? *Beneficial Ownership and Legal Responsibility* Paul Beckett, 2024-03-12

This book explores the connection between ownership on one hand and immunity from legal responsibility on the other. It presents a definition of the concept of beneficial ownership, the reasons for its concealment and failures in international legal structures and arrangements. Globally, states confront complex crimes such as corruption, tax evasion, doctrinal fanaticism, slave trafficking, terrorism and war. At the personal level, men and women may seek to escape their creditors to disinherit

unwanted heirs to cheat divorced partners and to appear straightforward when this is not the case The response of politicians and regulators has been a global state initiative to identify beneficial owners via public registers to promote transparency and accountability Yet at the same time there is an equally powerful global and personal counter initiative to promote beneficial ownership avoidance Where there is no owner there is no accountability This book examines what ownership means in legal terms across multiple legal systems and explains why singling out ownership as being pivotal to state and personal accountability is a strategy both flawed and disingenuous It is argued that an apparent lack of political will coupled with shape shifting definitions of ownership have resulted in tokenism Particular attention is paid to those orphan structures which have evolved from standard models or which have been designed for the purpose in each case of facilitating ownership concealment and avoidance The author explains how the virtual world of the blockchain crypto assets and cryptocurrency and virtual entities such as the Decentralised Autonomous Organisations DAOs all of which elude legal classification have opened a new world of possibilities Applicable across all jurisdictions and legal systems the book will be a valuable resource for academics researchers and policy makers working in the areas of financial crime regulation compliance business and accountancy *FDA Consumer* ,1980 **Federal Register** ,2013-07 **United States Code** United States,2018 *Corporate Governance in Colombia* OECD,2017-09-28 This review was prepared as part of the process of Colombia s accession to OECD Membership It describes the corporate governance setting for both listed companies in Colombia and the state owned sector *Regulatory Applications in Retail Food Establishments* ,1997 Provide basic instructions for applying Hazard Analysis and Critical Control Points HACCP in the food service industry [Compliance, Enforcement & Reporting in ...](#) United States.
