User Perception and Influencing Factors of Technology in Everyday Life Mesquita, Anabela,2012-08-31 An increasing amount of research is being developed in the area where technology and humans meet The success or failure of technologies and the question whether technology helps humans to fulfill their goals or whether it hinders them is in most cases not a technical one *User Perception and Influencing Factors of Technology in Everyday Life* addresses issues of human and technology interaction The research in this work is interdisciplinary ranging from more

technical subjects such as computer science engineering and information systems to non technical descriptions of technology and human interaction from the point of view of sociology or philosophy This book is perfect for academics researchers and professionals alike as it presents a set of theories that allow us to understand the interaction of technology and humans and to put it to practical use

Counter-Terrorism Technologies Peter Lehr,2018-07-10 This book critically discusses the role of technology for counter terrorism in general and for securing our vulnerable open societies in particular It is set against the backdrop of the terrorist threat posed by the combined forces of Al Qaeda and ISIS Daesh in the foreseeable future The book commences by illuminating current and foreseeable tactics and weapons used by these implacable enemies weapons that may well include chemical biological radiological and potentially even nuclear CBRN devices In a second part it introduces technologies already available or in development that promise an increase in safety and security when it comes to the dangers posed by these terrorists This part also includes a critical discussion of advantages and disadvantages of such technologies that are quite often sold as a silver bullet approach in the fight against terrorism Controversies such as those triggered by the abuse of millimeter wave scanners deployed at several Western European airports will demonstrate that there are costs involved with regard to human rights The third analytical part takes the critical discussion further by arguing that the uncritical fielding of new surveillance and control technologies in parallel with the on going outsourcing and privatization of key services of the state could well lead to dystopias as envisaged in a rather prescient way by the so called cyperpunk novels of the 1980s The book concludes with the question that any liberal democracy should ask itself how far can we go with regard to hardening our societies against terrorist threats

Portugal Investment and Business Guide Volume 1 Strategic and Practical Information IBP USA,2013-08 Portugal Investment and Business Guide

Strategic and Practical Information **Surveillance Technology** United States. Congress. Senate. Committee on the Judiciary. Subcommittee on Constitutional Rights, 1976 **Securing and Sustaining the Olympic City** Pete Fussey, Jon Coaffee, Dick Hobbs, 2016-04-01 Often seen as the host nation's largest ever logistical undertaking accommodating the Olympics and its attendant security infrastructure brings seismic changes to both the physical and social geography of its destination. Since 1976 the defence of the spectacle has become the central feature of its planning, one that has assumed even greater prominence following the bombing of the 1996 Atlanta Games and most importantly 9/11. Indeed the quintupled cost of securing the first post 9/11 summer Games in Athens demonstrates the considerable scale and complexity currently implicated in these operations. Such costs are not only fiscal. The Games stimulate a tidal wave of redevelopment ushering in new gentrified urban settings and an associated investment that may or may not soak through to the incumbent community. Given the unusual step of developing London's Olympic Park in the heart of an existing urban milieu and the stated commitments to community development and legacy these constitute particularly acute issues for the 2012 Games. In addition to sealing the Olympic Park from perceived threats 2012 security operations have also harnessed the administrative criminological staples of community safety and crime reduction to generate an ordered space in the surrounding areas. Of central importance here are the issues of citizenship engagement and access in urban spaces redeveloped upon the themes of security and commerce. Through analyzing the social and community impact of the 2012 Games and its security operation on East London this book concludes by considering the key debates as to whether utopian visions of legacy can be sustained given the demands of providing a global securitized event of the magnitude of the modern Olympics **Surveillance, Closed Circuit Television and Social Control** Clive Norris, Jade Moran, 2016-12-05 The rise of CCTV camera surveillance in Britain has been dramatic. Practically every major city now boasts a CCTV system aimed at among other things preventing detecting and reducing the fear of crime. Increasingly these developments are mirrored in villages, shopping malls, residential estates, transport systems, schools and hospitals throughout the country. In short for the majority of citizens it is now impossible to avoid being monitored and recorded as we move through public space. Surveillance, CCTV and Social Control represents the first systematic attempt to account for this phenomenon. It brings together leading researchers from the fields of anthropology, criminology, evaluation, geography, sociology and urban planning to explore the development, impact and implications of CCTV surveillance. Accordingly attention is directed to a number of key questions: How does CCTV fit with the trends of late modernity? Does CCTV reduce crime or merely shift it elsewhere? How should CCTV be evaluated? What is the significance of CCTV for women's safety? How adequate is the regulation of CCTV? In the light of recent technological developments what is the future of CCTV surveillance *Stopping the Spies* Jane Duncan, 2018-06-01 Is South Africa on its way to becoming a surveillance state and will it need a whistleblower? In 2013 former National Security Agency (NSA) contractor Edward Snowden leaked secret documents revealing that state agencies like the NSA had spied on the

communications of millions of innocent citizens International outrage resulted but the Snowden documents revealed only the tip of the surveillance iceberg Apart from insisting on their rights to tap into communications more and more states are placing citizens under surveillance tracking their movements and transactions with public and private institutions The state is becoming like a one way mirror where it can see more of what its citizens do and say while citizens see less and less of what the state does owing to high levels of secrecy around surveillance In this book Jane Duncan assesses the relevance of Snowden s revelations for South Africa In doing so she questions the extent to which South Africa is becoming a surveillance society governed by a surveillance state Duncan challenges members of civil society to be concerned about and to act on the ever expanding surveillance capacities of the South African state Is surveillance used for the democratic purpose of making people safer or is it being used for the repressive purpose of social control especially of those considered to be politically threatening to ruling interests She explores the forms of collective action needed to ensure that unaccountable surveillance does not take place and examines what does and does not work when it comes to developing organised responses
