

Linguistica Generale

Proprietà della lingua

Bipolarità: caratteristica che ammette l'esistenza di un significato ed un significante, l'uno come contenuto concettuale di una parola, l'altro come elemento concreto di rappresentazione.

Arbitrarietà: caratteristica per cui non vi è alcun legame naturalmente motivato fra il rapporto significante-significato, che avviene per convenzione → 1) arbitrario segno/referente, 2) arbitrario significante/significato, 3) arbitrario forma (struttura org interna)/sostanza (materia dei fatti), 4) arbitrario forma/sostanza dal pv linguistico → onomatopee come icone fonosimboliche.

Doppia articolazione: caratteristica che sottolinea come il significante di un segno linguistico sia organizzato e scomponibile in parti di prima articolazione recanti significato (ex: gatto = gatt - o) ed in parti di seconda articolazione non recanti più significato autonomo (g-a-t-t-o). Su di essa si basa l'economicità della lingua che con la combinatorietà può tirar fuori molte parole dal ristretto numero di elementi di seconda art.

Trasponibilità di mezzo: caratteristica del significante che può esser realizzato sia per mezzo del canale dell'aria (fonico), sia per quello visivo (segni) sia per quello scritto (lettere-segni).

Linearità e discretezza: la prima è caratteristica del significante che viene prodotto e si sviluppa nello spazio in una maniera coerente, la seconda identifica che la differenza fra gli elementi unitari è assoluta (p-ollo, b-ollo).

Onnipotenza semantica: caratteristica secondo la quale con la lingua è possibile dare forma a qualsiasi contenuto.

Plurifunzionalità: accezione dell'onnipotenza, che specifica come la lingua possa adempiere ad una lista di funzioni → emotiva (emittente), metalinguistica (codice), referenziale (contesto), conativa (ricevente), poetica (messaggio), fática (canale).

Riflessività: proprietà associata alla funzione metalinguistica, caratteristica del linguaggio che parla di sé.

Produttività: caratteristica connessa alla doppia articolazione ed all'onnipotenza, che concerne il fatto che con la lingua è sempre possibile creare messaggi nuovi su nuove esperienze; prende il nome di creatività regolare quando ad essa vengono associate regole ricorsive di scrittura od enunciazione (regole riapplicabili al prodotto cui danno luogo).

Distanziamento: possibilità della lingua di formulare messaggi relativi ad avvenimenti lontani nello spazio e nel tempo.

Libertà da stimoli: caratteristica dei segni linguistici come frutto di un'elaborazione della realtà svincolata da eventuali stimoli che inducano l'emittente alla comunicazione.

Complessità sintattica: trama plurima dei rapporti fra gli elementi e le parti di un segno linguistico.

Equivocità: caratteristica dei codici come quello linguistico che non pongono corrispondenze biunivoche ma plurivivoche fra gli elementi di una lista ed un'altra, nel nostro caso fra significante e significato.

Lingua: codice che organizza un sistema di segni dal significante fonico-acustico fondamentalmente arbitrari, capaci di esprimere esperienze mediante la produzione di infinite frasi partendo da elementi finiti.

Sincronia – diacronia: aspetti differenti mediante i quali si può guardare alla lingua lungo l'asse del tempo, la prima guarda ad essi a prescindere dall'evoluzione temporale, la seconda considera lo sviluppo temporale (come l'etimologia).

Sistema astratto – realizzazione concreta: il primo è inteso come l'insieme di conoscenze personali nella costruzione di un messaggio, il secondo come la realizzazione concreta del messaggio.

Asse paradigmatico – asse sintagmatico: sul primo troviamo elementi riguardanti le relazioni a livello del sistema (verbi, nomi ecc...) sul secondo troviamo invece le relazioni a livello delle strutture che realizzano il sistema stesso (successione di paradigmi).
