Business Innovation and Disruption in Publishing Robert DeFillippi, Patrik Wikstrom, 2022-02-28 This is the first volume in a book series examining how organizations in the creative industries respond to disruptive change and how they themselves generate business innovations The aspiration of this book series is to understand some of the common forces behind the disruptions occurring in so many creative industries today and identifying the most promising strategies and responses by organizations to create new value propositions business models and business practices that can enable these industry participants to cope with and eventually thrive as their industries and sectors are transformed The chapters included in the volume examine the processes of disruption and transformation due to the technology of the Internet social forces driven by social media the development of new portable digital devices with greater capabilities and smaller size the decreasing costs of new information and the creation of new business models and forms of intellectual property ownership rights for a digitized industry One gap that this book series seeks to fill is that between the study of business innovation and disruption by innovation

Mechatronics: Ideas, Challenges, Solutions and Applications Jan Awrejcewicz, Krzysztof J. Kaliński, Roman Szweczyk, Małgorzata

Kaliczyńska, 2015-12-14 This book presents recent advances and developments in control automation robotics and measuring techniques. It presents contributions of top experts in the fields focused on both theory and industrial practice. In particular, the book is devoted to new ideas, challenges, solutions, and applications of Mechatronics. The particular chapters present a deep analysis of a specific technical problem, which is in general followed by a numerical analysis and simulation and results of an implementation for the solution of a real world problem. The presented theoretical results, practical solutions, and guidelines will be useful for both researchers working in the area of engineering sciences and for practitioners solving industrial problems.
