

## ARTICLE REVIEW

In the article "Alterations in Brain and Immune Function Produced by Mindfulness Meditation" the researchers' question included the changes of mental and physical health in response to meditation. This problem was chosen because it had not been studied deeply before. A randomized and controlled study on the effects on brain and immune function was made. Forty-eight members of the group that was studied had average age of 36. The participants' age was from 23 to 56 years. All but two members were white. This group of people participated in special regular trainings in mindfulness meditation, and then their brain electrical activity was measured. The training reduced the anxiety among the members of the group and they had greater activation of the left side of the brain. In addition, they had a large rise in antibody titers. However, the study had some limitations. Additional research should be made (Davidson et al., 2003).

a. I have confidence in the researchers' findings. Meditation influences the brain activity and the immune system. However, the findings have some limitations. The group studied was very small. The age of the examinees ranged from 23 to 56 years. Therefore, the study did not focus on the people who are older or younger. All but two members were white, and it is a limitation, too. Moreover, the meditation training was not long. Thus, it is not clear what would be the results of people who meditate regularly during a long period. In addition, the members of the group were not professional meditators, and the results of the professionals could have been different.

b. To my opinion, the study does not generalize to other people that were not the subject of the research. As it was mentioned above, the ages of the participants ranged from 23 to 56 years. There were no participants below 23 years and above 56 years. Therefore, it is the

a fundamental grasp of AM including collaboration among educational bodies and between industry and governments strategies for implementing AM training new teaching methods training programs that provide alternative employment choices the need for certification by professional bodies and promoting awareness of AM in society This book offers an excellent source of information for researchers and industrial engineers who are interested in expanding their AM expertise and learning how to implement it It will also be of interest to readers who want to learn about the practicalities of adopting training and teaching for AM

*Feedstock-based Bioethanol Fuels. II. Waste Feedstocks* Ozcan Konur, 2023-12-22 This book provides an overview of research on the production of bioethanol fuels from waste feedstocks such as second generation residual sugar and starch feedstocks food waste industrial waste urban waste forestry waste and lignocellulosic biomass at large with 17 chapters In this context there are eight sections where the first two chapters cover the production of bioethanol fuels from waste feedstocks at large This book is the fourth volume in the Handbook of Bioethanol Fuels Six Volume Set It shows that pretreatments and hydrolysis of the waste feedstocks fermentation of hydrolysates and separation and distillation of bioethanol fuels are the fundamental processes for bioethanol fuel production from these waste feedstocks This book is a valuable resource for stakeholders primarily in research fields of energy and fuels chemical engineering environmental science and engineering biotechnology microbiology chemistry physics mechanical engineering agricultural sciences food science and engineering materials science biochemistry genetics molecular biology plant sciences water resources economics business and management transportation science and technology ecology public environmental and occupational health social sciences toxicology multi disciplinary sciences and humanities among others

**Research Methodologies in Supply Chain Management** Herbert Kotzab, Stefan Seuring, Martin Müller, Gerald Reiner, 2005-05-17 For research in all subjects and among different philosophical paradigms research methodologies form one of the key issues to rely on This volume brings a series of papers together which present different research methodologies as applied in supply chain management This comprises review oriented papers that look at what kind of methodologies have been applied as well as methodological papers discussing new developments needed to successfully conduct research in supply chain management The third group is made up of applications of the respective methodologies which serve as examples on how the different methodological approaches can be applied All papers have undergone a review process to ensure their quality Therefore we hope that this book will serve as a valid source for current and future researchers in the field While the workshop on Research Methodologies in Supply Chain Management took place at the Supply Chain Management Center Carl von Ossietzky University in Oldenburg Germany it is based on a collaboration with the Supply Chain Management Group of the Department of Operations Management at the Copenhagen Business School and the Department of Production Management at the Vienna University of Economics and Business Administration We would like to thank all those who contributed to the workshop and this book

Biodiesel Fuels Based on Edible and Nonedible Feedstocks, Wastes, and Algae Ozcan

Konur,2021-05-05 This second volume of the Handbook of Biodiesel and Petrodiesel Fuels presents a representative sample of the population papers in the field of feedstock specific biodiesel fuels The research on feedstocks for biodiesel fuels has first focused on the edible oils as first generation biodiesel fuels However the public concerns about the competition with foods based on these feedstocks and adverse impact on the ecological diversity and deforestation have resulted in the exploration of nonedible oil based biodiesel fuels as second generation biodiesel fuels in the first instance Due to the ecological and cost benefits of treating wastes waste oil based biodiesel fuels as third generation biodiesel fuels have emerged Furthermore following a series of influential review papers the research has focused on the algal oil based biodiesel fuels in recent years Since the cost of feedstocks in general constitutes 85% of the total biodiesel production costs the research focused more on improving biomass and lipid productivity in these research fields Furthermore since water CO<sub>2</sub> and nutrients primarily N and P have been major ingredients for the algal biomass and lipid production the research has also intensified in the use of wastewaters and flue gases for algal biomass production to reduce the ecological burdens and the production costs Part 1 presents a representative sample of the population papers in the field of edible oil based biodiesel fuels covering major research fronts It covers soybean oil based biodiesel fuels palm oil based biodiesel fuels and rapeseed oil based biodiesel fuels as case studies besides an overview paper Part 2 presents a representative sample of the population papers in the field of nonedible oil based biodiesel fuels covering major research fronts It covers Jatropha oil based biodiesel fuels polanga oil based biodiesel fuels and moringa oil based biodiesel fuels as case studies besides an overview paper Part 3 presents a representative sample of the population papers in the field of waste oil based biodiesel fuels covering major research fronts It covers wastewater sludge based biodiesel fuels waste cooking oil based biodiesel fuels and microbial oil based biodiesel fuels as case studies besides an overview paper Part 4 presents a representative sample of the population papers in the field of algal oil based biodiesel fuels covering major research fronts It covers algal biomass production in general algal biomass production in wastewaters algal lipid production hydrothermal liquefaction of algal biomass algal lipid extraction and algal biodiesel production besides an overview paper This book will be useful to academics and professionals in the fields of Energy Fuels Chemical Engineering Physical Chemistry Biotechnology and Applied Microbiology Environmental Sciences and Thermodynamics Ozcan Konur is both a materials scientist and social scientist by training He has published around 200 journal papers book chapters and conference papers He has focused on the bioenergy and biofuels in recent years In 2018 he edited Bioenergy and Biofuels that brought together the work of over 30 experts in their respective field He also edited Handbook of Algal Science Technology and Medicine with a strong section on the algal biofuels in 2020 Recent Advances and the Future Generation of Neuroinformatics Infrastructure Xi Cheng, Daniel R. Weinberger, Daniel Marcus, John Van Horn, Venkata Satyanand Mattay, Qian Luo, 2015-12-11 The huge volume of multi modal neuroimaging data across different neuroscience communities has posed a daunting challenge to traditional methods of data

sharing data archiving data processing and data analysis Neuroinformatics plays a crucial role in creating advanced methodologies and tools for the handling of varied and heterogeneous datasets in order to better understand the structure and function of the brain These tools and methodologies not only enhance data collection analysis integration interpretation modeling and dissemination of data but also promote data sharing and collaboration This Neuroinformatics Research Topic aims to summarize the state of art of the current achievements and explores the directions for the future generation of neuroinformatics infrastructure The publications present solutions for data archiving data processing and workflow data mining and system integration methodologies Some of the systems presented are large in scale geographically distributed and already have a well established user community Some discuss opportunities and methodologies that facilitate large scale parallel data processing tasks under a heterogeneous computational environment We wish to stimulate on going discussions at the level of the neuroinformatics infrastructure including the common challenges new technologies of maximum benefit key features of next generation infrastructure etc We have asked leading research groups from different research areas of neuroscience neuroimaging to provide their thoughts on the development of a state of the art and highly efficient neuroinformatics infrastructure Such discussions will inspire and help guide the development of a state of the art highly efficient neuroinformatics infrastructure
