

# CAPSTONE PROJECT FINAL REPORT

## 1. Introduction

The aim of this capstone project is to create a tutoring assistant which will prove to be effective in helping discrete math students to practice permutation and combination exercises. For the assistant to provide the needed guidance to a student who is struggling, it is needed to take into consideration both mathematical problem that will be solved, as well as the solution that is proposed by the learner.

This tutoring assistant will use a problem generator designed to test the knowledge of the student. This generator is created by another student, Ahmed Fangli, for his capstone project. Fangli's problem generator offers my program with a complete set of exercises prepared into text files, together with a metadata that shows their structure, taking into consideration the agreed on mathematical model which is used commonly in both our projects. My system makes good use of a natural language processing technique in order to parse generated files and further extract the structure of the problems.

## 2. Steeple Analysis

This highly intelligent assistant for discrete math tutoring is actually a prototype which can be later on developed into a more advanced and widely accessible system which helps students in better understanding and practicing various mathematical concepts that they study in a similar manner in order to work with a human tutor. The software may even be extended to other Math fields, such as Probabilities, Calculus, Chemistry and Physics, etc.

The primarily societal impact of this tutoring assistant is to provide support to one of the 14 Grand Challenges of Engineering. This is defined by the National Engineering Academy, particularly personalized learning. This type of learning is a growing field of interest, especially in

**Applied Supervised Learning with R** Karthik Ramasubramanian, Jojo Moolayil, 2019-05-31 Learn the ropes of supervised machine learning with R by studying popular real world use cases and understand how it drives object detection in driver less cars customer churn and loan default prediction Key Features Study supervised learning algorithms by using real world datasets Fine tune optimal parameters with hyperparameter optimization Select the best algorithm using the model evaluation framework Book Description R provides excellent visualization features that are essential for exploring data before using it in automated learning Applied Supervised Learning with R helps you cover the

complete process of employing R to develop applications using supervised machine learning algorithms for your business needs The book starts by helping you develop your analytical thinking to create a problem statement using business inputs and domain research You will then learn different evaluation metrics that compare various algorithms and later progress to using these metrics to select the best algorithm for your problem After finalizing the algorithm you want to use you will study the hyperparameter optimization technique to fine tune your set of optimal parameters To prevent you from overfitting your model a dedicated section will even demonstrate how you can add various regularization terms By the end of this book you will have the advanced skills you need for modeling a supervised machine learning algorithm that precisely fulfills your business needs What you will learn Develop analytical thinking to precisely identify a business problem Wrangle data with dplyr tidyr and reshape2 Visualize data with ggplot2 Validate your supervised machine learning model using k fold Optimize hyperparameters with grid and random search and Bayesian optimization Deploy your model on Amazon Web Services AWS Lambda with plumber Improve your model s performance with feature selection and dimensionality reduction Who this book is for This book is specially designed for novice and intermediate level data analysts data scientists and data engineers who want to explore different methods of supervised machine learning and its various use cases Some background in statistics probability calculus linear algebra and programming will help you thoroughly understand and follow the content of this book

Engineering Design Cory J. Mettler, 2023-06-01 Engineering Senior Design is perhaps the course that most resembles what an engineering professional will be required to do during their career it is the bridge between the academic classroom and the engineering profession This textbook will support students as they learn to apply their previously developed skills to solve a complex engineering problem during a senior level design course This textbook follows the design life cycle from project initiation to completion and introduces students to many soft engineering skills such as communication scheduling and technical writing in the context of an engineering design Students are instructed how to define an engineering problem with a valid problem statement and requirements document They will conceptualize a complex solution and divide that solution into manageable subsystems More importantly they will be introduced to Project Management techniques that will help students organize workloads develop functional engineering teams and validate solutions all while increasing the likelihood of a successful completion to the project Throughout the experience students are instructed that a well intentioned solution is not particularly useful unless it can be communicated and documented To that end this textbook will help students document their work in a professional manner and to present their ideas to stakeholders in a variety of formal design reviews With the support of this textbook by the end of a student s senior design experience each individual will be ready to communicate with other engineering professionals effectively support engineering design teams and manage complex project to solve the next generation s engineering challenges **Undergraduate Research at Community Colleges** Nancy H. Hensel, 2023-07-03 Co published with the Council on Undergraduate Research This book highlights the exciting work of two

year colleges to prepare students for their future careers through engagement in undergraduate research. It emerged from work in five community college systems thanks to two National Science Foundation grants. The Council for Undergraduate Research received to support community colleges efforts to establish undergraduate research programs. Chapters one two and three provide background information about community colleges undergraduate research and the systems the author worked with. California City University of New York Maricopa Community College District Arizona Oklahoma and Tennessee. Chapter four examines success strategies. The next five chapters look at five approaches to undergraduate research: basic applied course based community based interdisciplinary and partnership research. Chapters ten eleven and twelve discuss ways to assess and evaluate undergraduate research experiences inclusive pedagogy and ways to advance undergraduate research. Today there are 942 public community colleges in the United States providing affordable access to 6.8 million students who enrolled for credit in one of the public two year institutions in the United States. Students are more prepared for the next step in their education or careers after participating in quality UR experiences.

*De Gruyter Handbook of Responsible Project Management* Beverly L. Pasian, Nigel L. Williams, 2023-01-30 The narrative about the project management profession is dominated by discussions of success and failure along with the need to improve the competence of project managers. As a result the community is engaged in a fruitless search for a combination of tools techniques and practices that will result in desired outcomes for funders. While the profession has made recent attempts to incorporate environmental and social responsibility these areas are still framed within the existing discourses of project delivery. The De Gruyter Handbook of Responsible Project Management seeks to rethink project management by integrating contributions from the emerging responsible Management domain. This handbook will explore the nature and extent of project professionals responsibility at different levels: individual team organizational and societal along with the implications for education research and practice. The De Gruyter Handbook of Responsible Project Management offers cutting edge insights into the field of project management. It is an essential reference for scholars and practitioners.

**Proceedings** American Society for Engineering Education,1987 **American Catch** Paul Greenberg,2014-06-26

INVESTIGATIVE REPORTERS EDITORS Book Award Finalist 2014 Greenberg s breezy engaging style weaves history politics environmental policy and marine biology New Yorker From the acclaimed author of Four Fish and The Omega Principle Paul Greenberg uncovers the tragic unraveling of the nation s seafood supply telling the surprising story of why Americans stopped eating from their own waters in American Catch In 2005 the United States imported five billion pounds of seafood nearly double what we imported twenty years earlier Bizarrely during that same period our seafood exports quadrupled American Catch examines New York oysters Gulf shrimp and Alaskan salmon to reveal how it came to be that 91 percent of the seafood Americans eat is foreign In the 1920s the average New Yorker ate six hundred local oysters a year Today the only edible oysters lie outside city limits Following the trail of environmental desecration Greenberg comes to view the New York City oyster as a reminder of what is lost when local waters are not valued as a food source Farther south a different

catastrophe threatens another seafood rich environment When Greenberg visits the Gulf of Mexico he arrives expecting to learn of the Deepwater Horizon oil spill s lingering effects on shrimpers but instead finds that the more immediate threat to business comes from overseas Asian farmed shrimp cheap abundant and a perfect vehicle for the frying and sauces Americans love have flooded the American market Finally Greenberg visits Bristol Bay Alaska home to the biggest wild sockeye salmon run left in the world A pristine productive fishery Bristol Bay is now at great risk The proposed Pebble Mine project could under mine the very spawning grounds that make this great run possible In his search to discover why this precious renewable resource isn t better protected Green berg encounters a shocking truth the great majority of Alaskan salmon is sent out of the country much of it to Asia Sockeye salmon is one of the most nutritionally dense animal proteins on the planet yet Americans are shipping it abroad Despite the challenges hope abounds In New York Greenberg connects an oyster restoration project with a vision for how the bivalves might save the city from rising tides In the Gulf shrimpers band together to offer local catch direct to consumers And in Bristol Bay fishermen environmentalists and local Alaskans gather to roadblock Pebble Mine With American Catch Paul Greenberg proposes a way to break the current destructive patterns of consumption and return American catch back to American eaters The Washington Post Americans need to eat more American seafood It s a point Greenberg makes compellingly clear in his new book American Catch The Fight for our Local Seafood Greenberg had at least one convert me Jane Brody New York Times Excellent The Los Angeles Times If this makes it sound like American Catch is another of those dry haranguing issue driven books that you read mostly out of obligation you needn t worry While Greenberg has a firm grasp of the facts he also has a storyteller s knack for framing them in an entertaining way The Guardian UK A wonderful new book Tom Colicchio This is on the top of my summer reading list A Fast Food Nation for fish **Journal of Education for Social Work** ,2008
