Applications

1. The population being studied is the teenagers who read the magazine. The sampling method is to ask readers to voluntarily write in to the magazine.
2. The population being studied is middle school students. The eighth-grade students keep records of the time they spend on the phone each day for a week.
3. The population being studied is middle school students. Forty cards are chosen from a box containing cards with the names of all the students in the school.
4. The population being studied is students who attend the particular school. The sampling method is to somehow choose 26 students, one with a name beginning with A, one with B, etc.
5. Systematic selection; Systematic selection from class lists would probably give a fairly predictive sample, provided the lists include the names of all students in the school. However, some homerooms will be under-represented, and students with names such as “Aardvart” are probably excluded.
6. Random selection; Based on the assumption that 350 students attend the assembly, selection by choosing red and white beans could produce a representative sample because every student has an equal chance of being in the sample.
7. Convenience Sampling; Selection by surveying all members of particular classes would probably not give a representative sample because all students do not have an equally likely chance of being surveyed. It may be that students in these classes are assigned more homework on average and thus spend more time doing homework.
8. Voluntary response; This voluntary-response method would not give a representative sample because it depends on people’s choosing to complete and return the surveys. Not everyone will complete a survey, and those who do may not place it in the box at the end of the day; those who complete surveys may have some special reason for responding.
9. Voluntary response; Possible explanation: The results of this survey may not describe the opinions of all the show’s listeners because only those listeners that have the time and want to call in with their opinion will be included. Some may try to call in and may not get through, while others may not listen to the radio program at the time that the opinion question is asked because they are at work.
