processing and human performance Challenge the way they think about technology s influence on human performance show how theoretical advances have been or might be applied to improving human machine interaction *THE Journal* ,1997

Enhancing Instruction with Visual Media: Utilizing Video and Lecture Capture Smyth, Ellen G.,Volker, John X.,2013-04-30 This book offers unique approaches for integrating visual media into an instructional environment by covering the impact media has on student learning and various visual options to use in the classroom Provided by publisher Explanatory Animations in the Classroom Brendan Jacobs,2020-03-06 This book provides groundbreaking evidence demonstrating how student authored explanatory animations can embody and document learning as an exciting new development within digital pedagogy Explanatory animations can be an excellent resource for teaching and learning but there has been an underlying assumption that students are predominately viewers rather than animation authors The methodology detailed in this book reverses this scenario by putting students in the driver s seat of their own learning This signals not just a change in perspective but a complete change in activity that to continue the analogy will forever change the conversation and make redundant phrases like Are we there yet and How much longer The digital nature of such practices provides compelling evidence for reconceptualising explanatory animation creation as a pedagogical activity that generates multimodal assessment data Tying together related themes to advance approaches to evidence based assessment using digital technologies this book is intended for educators at any stage of their journey including pre service teachers
