Design Research in Information Systems Alan Hevner, Samir Chatterjee, 2010-06-14. It is 5 years since the publication of the seminal paper on Design Science in Information Systems Research by Hevner, March, Park, and Ram in MIS Quarterly and the initiation of the Information Technology and Systems department of the Communications of AIS. These events in 2004 are markers in the move of design science to the forefront of information systems research. A sufficient interval has elapsed since then to allow assessment of from where the field has come and where it should go. Design science research

and behavioral science research started as dual tracks when IS was a young field. By the 1990s the influx of behavioral scientists started to dominate the number of design scientists and the field moved in that direction. By the early 2000s design people were having difficulty publishing in mainline IS journals and in being tenured in many universities. Yes, an annual Workshop on Information Technology and Systems (WITS) was established in 1991 in conjunction with the International Conference on Information Systems (ICIS) and grew each year. But that was the extent of design science recognition. Fortunately, a revival is underway. By 2009 when this foreword was written, the fourth DESRIST conference has been held and plans are afoot for the 2010 meeting. Design scientists regained respect and recognition in many venues where they previously had little.
