**The Game Culture Reader** Jason Thompson, 2014-07-18 In *The Game Culture Reader* editors Jason C Thompson and Marc A Ouellette propose that Game Studies that peculiar multi inter and trans disciplinary field wherein international researchers from such diverse areas as rhetoric computer science literary studies culture studies psychology media studies and so on come together to study the production distribution and consumption of games has reached an unproductive stasis Its scholarship remains either divided as in the narratologists versus ludologists debate or indecisive as in its frequently apolitical stances on play and fandom Thompson and Ouellette firmly hold that scholarship should be

distinguished from the repetitively reductive commonplaces of violence sexism and addiction In other words beyond the headline friendly modern topoi that now dominate the discourse of Game Studies what issues approaches and insights are being if not erased then displaced This volume gathers together a host of scholars from different countries institutions disciplines departments and ranks in order to present original and evocative scholarship on digital game culture Collectively the contributors reject the commonplaces that have come to define digital games as apolitical or as somehow outside of the imbricated processes of cultural production that govern the medium itself As an alternative they offer essays that explore video game theory ludic spaces and temporalities and video game rhetorics Importantly the authors emphasize throughout that digital games should be understood on their own terms literally this assertion necessitates the serious reconsideration of terms borrowed from other academic disciplines figuratively the claim embeds the embrace of game play in the continuing investigation of digital games as cultural forms Put another way by questioning the received wisdom that would consign digital games to irrelevant spheres of harmless child s play or of invidious mass entertainment the authors productively engage with ludic ambiguities

**How the Other Half Looks** Sara Blair, 2020-07-14 New York City s Lower East Side long viewed as the space of what Jacob Riis notoriously called the other half was also a crucible for experimentation in photography film literature and visual technologies This book takes an unprecedented look at the practices of observation that emerged from this critical site of encounter showing how they have informed literary and everyday narratives of America its citizens and its possible futures Taking readers from the mid nineteenth century to the present Sara Blair traces the career of the Lower East Side as a place where image makers writers and social reformers tested new techniques for apprehending America and their subjects looked back confronting the means used to represent them This dynamic shaped the birth of American photojournalism the writings of Stephen Crane and Abraham Cahan and the forms of early cinema During the 1930s the emptying ghetto opened contested views of the modern city animating the work of such writers and photographers as Henry Roth Walker Evans and Ben Shahn After World War II

the Lower East Side became a key resource for imagining poetic revolution as in the work of Allen Ginsberg and LeRoi Jones and exploring dystopian futures from Cold War atomic strikes to the death of print culture and the threat of climate change How the Other Half Looks reveals how the Lower East Side has inspired new ways of looking and looking back that have shaped literary and popular expression as well as American modernity

**Caste, Communication and Power** Biswajit Das, Debendra Prasad Majhi, 2021-07-12 Caste Communication and Power explores communication and the constitution of caste in Indian society Intimately connected both communication and caste are determined by historical developments The book looks at communication as a lens to study caste and power relations with its immense potential to shape perception and affect ground reality It also studies the evolution of the conceptual and theoretical foundations of caste and power relations and maps their emergence from communicative resources and practices These communication practices are inevitably linked to the social structure with their reliance on symbolic forms of self expression often revealing the underlying ideological attitudes The book studies this interface of culture and media evaluating the caste question and the associated power relations in terms of modes of communication practised in the society
