The China Collection Ian Williams, 2023-04-01 As seen in The Times Sunday Times Spectator and on Tonight with Andrew Marr LBC Join journalist Ian Williams as he examines China like never before He begins with the extraordinary rise of the Chinese surveillance state how information is controlled and how it affects the population before moving his gaze outward to examine China's aggressive foreign policy in relation to Taiwan and the wider world Thought provoking and alarming these books are crucial to understanding China as a nation and global competitor Ian Williams brings his years of expertise as a foreign correspondent to bear having reported on China across the last 25 years providing unmatched insight into a country that many do not fully understand Titles included in this eBook bundle are Every Breath You Take The Fire of the Dragon

The Return of Great Power Rivalry Matthew Kroenig, 2020-02-13 The United States of America has been the most powerful country in the world for over seventy years but recently the U S National Security Strategy declared that the return of great power competition with Russia and China is the greatest threat to U S national security Further many analysts predict that America's autocratic rivals will have at least some success in disrupting and in the longer term possibly even displacing U S global leadership Brilliant and engagingly written The Return of Great Power Rivalry argues that this conventional wisdom is wrong Drawing on an extraordinary range of historical evidence and the works of figures like Herodotus Machiavelli and Montesquieu and combining it with cutting edge social science research Matthew Kroenig advances the riveting argument that democracies tend to excel in great power rivalries He contends that democracies actually have unique economic diplomatic and military advantages in long run geopolitical competitions He considers autocratic advantages as well but shows that these are more than outweighed by their vulnerabilities Kroenig then

shows these arguments through the seven most important cases of democratic versus autocratic rivalries throughout history from the ancient world to the Cold War Finally he analyzes the new era of great power rivalry among the United States Russia and China through the lens of the democratic advantage argument By advancing a hard power argument for democracy Kroenig demonstrates that despite its many problems the U S is better positioned to maintain a global leadership role than either Russia or China A vitally important book for anyone concerned about the future of global geopolitics The Return of Great Power Rivalry provides both an innovative way of thinking about power in international politics and an optimistic assessment of the future of American global leadership

China's Peaceful Rise Le Hu, 2025-02-19 This book examines the extent to which China has stabilized its communist regime and defended or pursued its crucial nationalist interests while maintaining a relatively peaceful environment in East Asia Despite a politics which would seem to be unassimilable and assertive policies regarding sovereignty disputes or the Taiwan question China exists more or less peacefully within East Asia This raises an important question how has this being done Using Social Identity Theory and Chinese Communist Party's united front strategy the author uncovers new angles on the mentality and trajectory of Chinese foreign policy in a study that will interest scholars policymakers and journalists

Russia, China and the Revisionist Assault on the Western Liberal International Order Gerlinde Groitl, 2023-05-22 This book analyzes Russian and Chinese revisionism in the face of US and Western post Cold War liberal international order building and asks why both powers have turned revisionist in the late 2000s The study develops a neoclassical realist model of international order building and contestation and posits to view revisionism as a strategic choice States go revisionist if the status quo international order threatens their vital security needs broadly defined not only as territorial security but also political economic normative and ontological and if they have the means to challenge the undesirable status quo Russia and China were both unhappy with the post Cold War international order of American designs but had to opt for accommodation in the 1990s and early 2000s strategic accommodation in the Chinese case resentful accommodation in the Russian case before revisionism became even more of a necessity and a real policy option from the late 2000s onward constructive revisionism in the Chinese case destructive revisionism in the Russian case The author calls for a policy of neo containment to counter Moscow's and Beijing's efforts to game and erode the international order

Introduction to Digital Transformation Abbas Strømme-Bakhtiar, This book aims to inform the non IT specialist about the technological revolution that is taking place and specifically how the digital component of it is affecting our lives It is hoped that this information will fill possible information gaps in readers mental model enabling them to make better informed decisions This book can also be used as a textbook in a stand alone introductory course to the digital revolution and its effects on society The course could be used in both bachelor and master degree programs in business management healthcare management sociology or any other non IT programs Chapter 1 This chapter although the longest is a brief review of the interactions between technology economy and politics

The subject is a much neglected one and I believe that understanding of these interactions is vital for understanding the underlying causes of some of our most important pressing issues. The chapter discusses the interactions between technologies, economy and politics, examining the effect of technologies on economic development and political ideologies.

Chapter 2 This chapter deals with technological revolutions in general and the digital revolution in particular. I shall discuss the components of the digital economy. These being knowledge, digitisation, virtualisation, molecularization, integration, internetworking, disintermediation, convergence, innovation, sharing economy, immediacy and discordant. In addition, we shall examine the disruptors that are changing the face of competition in the marketplace.

Chapter 3 This chapter deals with digital transformation, i.e. the process of using digital technology in all areas of business, changing the way the businesses operate and deliver value to their customers. We shall examine models for dealing with digital transformation.

Chapter 4 We shall examine one of the most important developments of the 21st century, namely the advancements in Artificial Intelligence (AI). We shall look at how the human brain works and what is intelligence. We shall look at the artificial neural networks, machine learning and deep learning. We shall also look at the deployment of AI in various fields such as healthcare, finance, Natural Language Processing (NLP), news, media and warfare.

Chapter 5 This chapter deals with one of the most controversial and yet promising developments in finance and distributed secure databases, namely cryptocurrencies and blockchains. This subject is divided into two parts: the first part deals with the cryptocurrencies and their viability as currencies. One of the most popular cryptocurrencies, the Bitcoin, will be examined in depth. The second part is somewhat technical and deals with the inner workings of the blockchains. As with cryptocurrencies, many see a bright future for the blockchains, especially in the form of smart contracts. Many believe that blockchains will be of great value in areas such as finance, handling contracts, healthcare and more. Blockchain promises to bring disintermediation to many industries and thereby reduce costs.

Chapter 6 Technological revolutions tend to disrupt the lives of many middle-aged and older workers. New technologies give birth to new industries, destroying the old industries in the process. New technologies often require special skills that the old industry workers do not possess. The laid-off workers of the old industries can seldom find jobs in new industries since the new industries often rely on new technologies and skills that the old industry workers do not possess. These workers need training, something that the prospective employers do not provide. Also, the new technologies, including AI, are automating many tasks, reducing the need for human workers. This chapter discusses the issue of automation and its effect on employment. Additionally, the type of jobs that are in danger of automation is discussed as well.

Chapter 7 While chapter six discussed the employment situation, chapter seven considers the type of education required by the new industries. Also, the weaknesses of the existing educational system are considered, and alternative systems are proposed.

Chapter 8 History tells us that whenever there has been a technological revolution, it has been accompanied by a shift in power, both nationally and internationally. The global shift of power has seldom been a peaceful affair. It often has resulted in major wars and global

reorientation This chapter discusses the possibility of the global shift of power Currently there are not that many countries or entities that can be considered as contenders Of the three Russia European Union and China only one China is considered to have any chance of wresting power from the United States The technological economic and military power of China is compared and contrasted with the United States *China's Belt And Road Initiative In Asean: Growing Presence, Recent Progress And Future Challenges* Suthiphand Chirathivat,Buddhagarn Rutchatorn,Anupama Devendrakumar,2022-01-27 Southeast Asia s interactions with China have tremendously transformed and prospered in the recent decades with China becoming ever more present on Southeast Asian soil in recent history touching all dimensions economic political social and cultural The current ASEAN China dynamics are remarkably different from the past bearing both excitement and caution for watchers In this context the advent of China s Belt and Road Initiative BRI has added a new perspective to the nature of China s rise in ASEAN As the various BRI projects continue to unfold in ASEAN countries public concerns about the impact of these projects are on the rise However there has not been enough extensive study on this issue This edited book contributes towards bridging the knowledge gap by facilitating experts from ASEAN China and beyond to discuss reflect debate the ground realities of BRI based on the local governments and local people s experiences and narratives The chapters in this volume address various dimensions of the BRI provide unique perspectives empirical evidence and updated information on the overall progress of BRI in ASEAN

Post-Truth Public Relations Gareth Thompson,2020-01-17 This book explores the purpose practice and effects of public relations PR at a time that has been variously described as an era of populism post truth and fake news It considers how PR processes have contributed to the current social condition of post truth and what constitutes PR work in this environment *Post Truth Public Relations Communication in an Era of Digital Disinformation* proposes that while we can now look back upon the last 80 100 years as a period of classical PR that style is being supplemented by the emergence of a post classical form of PR that has emerged in response to the post truth era This new style of PR consists of a mixed repertoire of communicative work that matches the new geometry of digital media and delivers a mix of online engagement and persuasion in order to meet the needs of increasingly partisan audiences Using contemporary case studies and original interviews with PR practitioners in several countries including China and the Philippines the book investigates how PR workers have reconciled their role as communicative intermediaries with the post truth era of digital disinformation This thought provoking book will be of great interest to researchers and advanced students interested in the changing nature of PR and its practice [Digitized by srujanika@gmail.com](#),2021-12-31 d d d [Every Breath You Take - Featured in The Times and Sunday Times](#) Ian Williams,2021-04-01 one of the year s most exciting releases The Herald China is building the world s first digital totalitarian state a system of hitherto unimaginable social and political control Internet freedom has been eliminated and ubiquitous surveillance cameras employ the latest facial recognition technology Through flagrant cyber espionage it has plundered Western technology on a massive scale bullied Western tech companies

and academics though many have been willing accomplices and intimidated critics worldwide In doing so it has become a model for aspiring dictators everywhere Ian Williams examines the extraordinary rise of the Chinese surveillance state showing how it has been driven by the enigmatic Xi Jinping now effectively president for life and how it impacts the daily lives of Chinese citizens particularly dissidents and those from ethnic minorities Supporting interviews and first hand accounts from those whose lives have been turned upside down or worse highlight the chilling and ruthless efficiency with which the government can now act The book also considers the wider implications for the rest of the world How to deal with an increasingly strident aggressive Beijing is one of the biggest challenges facing the West in what has become a technological Cold War 664 2018-06-01 *China's Rise in Asia* Robert G. Sutter,2005-04-14

China's rapid military and economic growth has fuelled a steady stream of analysis and debate about the PRC's motivations and objectives regarding the United States Yet until now there has not been a sustained single authored assessment in English of China's expanding influence in Asia in the post Cold War period Respected analyst Robert G Sutter draws on his extensive experience in the region to explore the current debate on China's rise and its meaning for U S interests by examining in detail China's current and historical relations with the key countries of Asia He finds a range of motivations underlying China's recent initiatives Some incline Chinese policy to be cooperative with the United States others to be competitive and confrontational Sutter's nuanced study shows that U S power and influence continue to dominate Asia and play a critical role in determining China's cooperative or confrontational approach He argues that the Bush administration's policies of firmness and cooperation have encouraged China to stay on a generally constructive track in the region 674 2020-02-01
