Drones and Terrorism Nicholas Grossman, 2018-01-31 In war zones ordinary commercially available drones are used for extraordinary reconnaissance and information gathering They can also be used for bombings a drone carrying an explosive charge is potentially a powerful weapon At the same time asymmetric warfare has become the norm with large states increasingly fighting marginal terrorist groups in the Middle East and elsewhere Here Nicholas Grossman shows how we are entering the age of the drone terrorist groups such as Hezbollah are already using them in the Middle East Grossman will analyse the ways in which the United States Israel and other advanced militaries use aerial drones and ground based robots to fight non state actors e.g. ISIS al Qaeda the Iraqi and Afghan insurgencies Hezbollah Hamas etc and how these groups as well as individual terrorists are utilizing less advanced commercially available drones to fight powerful state opponents Robotics has huge implications for the future of security terrorism and international relations and this will be essential reading on the subject of terrorism and drone warfare
