cap as the author shows you how to capitalize on these cycles in your IRA and 401 k accounts Mohan 21st Century Futures This is a must read for anyone interested in the business cycles and their impact on investment dynamics and making money in the stock market The book brings together multiple cycle theories in a comprehensive reading style Bruce Gulliver Editor Torpedo Watch [Bring on the Crash](#) Richard Stooker, 2011-08-17 NOTE This book is all original and all unique content The U S dollar is on the verge of catastrophe For the first time in history the debt of the most powerful government on Earth leading the world s largest economy has been downgraded by Standard Poor s to Double AA from a perfect Triple AAA The political grandstanding of the Republicans and Democrats over the debt ceiling made many Americans and others around the world doubt our leadership And many feel the final deal between doesn t go far enough to reduce US government spending US government debt now equals the country s Gross Domestic Product GDP That s like you or I owing an entire year of our incomes to Mastercard and Visa The 2007 2009 financial crisis appears to have been the first step toward a deflationary depression that could destroy the savings of three generations of Americans We ve technically been recovering since March 2009 but despite all government and Fed actions to stimulate the US economy unemployment stubbornly remains over 9% That is unless the government s massive cash creation unleashes a wave of hyperinflation The US dollar has recently hit new record lows against the Japanese yen and Swiss franc despite massive interventions by the central banks of those two countries China has divested itself of 97% of its holdings of short term US Treasury bills That happened by March 2011 well before the current downgrade China still owns many billions of US dollars of long term Treasury bonds and is clearly worried about the future They are making a big show of supporting Europe s economy so they have an alternative to the US dollar What is wrong with us when the biggest Communistic country on Earth has to lecture us on how to manage our currency How much longer will China Japan and international bankers continue to buy U S Treasury bonds to finance our swelling budget If these countries began selling US dollars instead of buying the hyperinflation would bankrupt America We and Europeans are also threatened by the debt problems of Europe Greece nearly went up in flames over austerity measures forced on that country Italy Spain Portugal and Ireland are also in bad shape How long will France and German taxpayers continue to support them If the euro breaks up that will create more financial instability for the entire world Gold recently hit a record high of 1 813 per ounce I can t tell you exactly what is going to happen in the treacherous foreign exchange and financial markets in the future Maybe another recession the double dip some have been predicting since April 2009 Maybe deflation leading to a horrific depression Maybe hyperinflation Maybe a total collapse of the world s financial markets and infrastructure All I know for sure and every day s headlines confirm this is that the future for the US dollar euro and other fiat currencies looks dark and ugly Bring on the Crash offers a 3 part process to protect yourself and your family from these dangers Whether you have 2 000 or 2 million this volume contains the resources you need to make sure you weather the coming storm This 3 step process is a comprehensive plan to survive almost all financial emergencies the US dollar is now
