 technologies have now reached a level where even the most critical business systems can run on them For most
 organizations SAP is the key business system If SAP is unavailable for any reason then potentially your business stops
 Because of this it is understandable that you will be concerned whether such a critical system can run in the public cloud
 However the days when you truly ran your IT system on premises have long since gone Most organizations have been getting
 rid of their own data centers and increasingly moving to co location facilities In this context the public cloud is nothing more
 than an additional virtual data center connected to your existing network There are typically two main reasons why you may
 consider migrating SAP to Azure You need to replace the infrastructure that is currently running SAP or you want to migrate
 SAP to a new database Depending on your goal SAP offers different migration paths You can decide either to migrate the
 current workload to Azure as is or to combine it with changing the database and execute both activities as a single step SAP
 on Azure Implementation Guide covers the main migration options to lead you through migrating your SAP data to Azure
 simply and successfully What you will learn Successfully migrate your SAP infrastructure to Azure Understand the security
 benefits of Azure See how Azure can scale to meet the most demanding of business needs Ensure your SAP infrastructure
 maintains high availability Increase business agility through cloud capabilities Leverage cloud native capabilities to enhance
