Conference, 2005 Igbo Metalanguage E. Nọlue Emenanjo, I. A. O. Umeh, J. U.

Ugoji, 1990 Nigeria's language policy in education is that the first three years instruction should be in the medium of the child's mother tongue. Furthermore, two out of the three main Nigerian languages are recognised as core subjects. These volumes therefore arose from the need for effectively handling the languages. A single Igbo term can be expressed in different ways given the many dialects within the language. Also, there are many English terms with no ready equivalent in Igbo language. The development of Igbo metalanguage addresses these issues and more than 3 500 terms have been developed. The terms cover the major areas of language studies such as phonetics, phonology, syntax, stylistics, literary appreciation and methodology. The Cambridge Handbook of Phonetics Rachael-Anne Knight, Jane Setter, 2021-12-02

Phonetics, the study and classification of speech sounds, is a major sub-discipline of linguistics. Bringing together a team of internationally renowned phoneticians, this handbook provides comprehensive coverage of the most recent cutting-edge work in the field and focuses on the most widely debated contemporary issues. Chapters are divided into five thematic areas: segmental production, prosodic production, measuring speech, audition and perception, and applications of phonetics. Each chapter presents an historical overview of the area along with critical issues, current research, and advice on the best practice for teaching phonetics to undergraduates. It brings together global perspectives and includes examples from a wide range of languages, allowing readers to extend their knowledge beyond English. By providing both state-of-the-art research information and an appreciation of how it can be shared with students, this handbook is essential both for academic phoneticians and anyone with an interest in this exciting, rapidly developing field.
