years ago are no longer regarded as acceptable. New regulations frequently stipulated nonflammable materials for almost all stairs. This resulted in a decline in the quality of stair construction. What is more, fewer and fewer craftsmen were trained for this generously proportioned dwellings including, of course, rewarding and varied branch of woodworking craftsmanship. This is a regrettable development since good stair builders must combine the design capabilities and three dimensional approach. The style of living has changed. The time when sober intent of the carpenter with the exact and neat craftsmanship of the joiners were the order of the day has gone. Excessive nostalgic era. Techniques of Staircase Construction therefore provides welcome reversal to previous styles has also passed.
