,1892 **The Literary Digest**, 1892 *Discovering the Spiritual Wisdom of Trees* Beth Norcross, Leah Rampy, 2025-04-22 There is great wisdom to learn from trees, and when we connect intimately with them, we can deepen our spiritual lives and grow in the understanding that all beings are part of the fabric of the holy. There's something about a majestic redwood, the sweet pink blossoms of a cherry tree in spring, or even a scrawny little pine that moves us in ways we don't fully comprehend. Trees have much to offer as soul friends, and their millennia of growth and loss provides deep wisdom if we pay attention. *The Spiritual Wisdom of Trees* encourages us to revel in the beauty and wonder of trees as they increase our capacity to bear witness to loss and grief and model adaptation and resilience. Integrating science and spirituality, coauthors Beth Norcross and Leah Rampy explore the knowledge held within the living world of trees and planted within each of us. Drawing on extensive experience in both forest ecology and spirituality, Norcross and Rampy invite us into a deep mutual relationship with trees whose wisdom provides comfort, resilience, guidance, and hope during these challenging times. Expanding on their popular six-week video course offered through The Center for Spirituality in Nature, Norcross and Rampy offer us guidance and practices based on their experiences leading walks, retreats, and pilgrimages for over two decades. Having witnessed the profound healing and restorative power of trees, they offer us the wisdom of trees as wordless ministers to weary souls. When we learn the ecology of the forest and how to be present to the trees, our eyes are opened to the awe and wonder of our world, deepening our sense of sacred oneness. The Center for Spirituality in Nature. The Center for Spirituality in Nature provides

opportunities for deepening spirituality through nature and for nurturing loving relationships with the Earth Through spiritual re awakening re grounding and re orientation we mindfully participate in the healing of the Earth community of which we are called to be a loving part Learn more at centerforspiritualityinnature.org

Mitchell Reyes,2021-04-15 As discrete fields of inquiry rhetoric and mathematics have long been considered antithetical to each other That is if mathematics explains or describes the phenomena it studies with certainty persuasion is not needed This volume calls into question the view that mathematics is free of rhetoric Through nine studies of the intersections between these two disciplines Arguing with Numbers shows that mathematics is in fact deeply rhetorical Using rhetoric as a lens to analyze mathematically based arguments in public policy political and economic theory and even literature the essays in this volume reveal how mathematics influences the values and beliefs with which we assess the world and make decisions and how our worldviews influence the kinds of mathematical instruments we construct and accept In addition contributors examine how concepts of rhetoric such as analogy and visuality have been employed in mathematical and scientific reasoning including in the theorems of mathematical physicists and the geometrical diagramming of natural scientists Challenging academic orthodoxy these scholars reject a math equals truth reduction in favor of a more constructivist theory of mathematics as dynamic evolving and powerfully persuasive By bringing these disparate lines of inquiry into conversation with one another Arguing with Numbers provides inspiration to students established scholars and anyone inside or outside rhetorical studies who might be interested in exploring the intersections between the two disciplines In addition to the editors the contributors to this volume are Catherine Chaput Crystal Broch Colombini Nathan Crick Michael Dreher Jeanne Fahnestock Andrew C Jones Joseph Little and Edward Schiappa

Romanticism and Modernity Thomas Pfau, Robert Mitchell, 2014-07-16 Though traditionally defined as a relatively brief time period typically the half century of 1780 1830 the Romantic era constitutes a crucial indeed unique transitional phase in what has come to be called modernity for it was during these fifty years that myriad disciplinary aesthetic economic and political changes long in the making accelerated dramatically Due in part to the increased velocity of change though most of modernity's essential master tropes such as secularization instrumental reason individual rights economic self interest emancipation system institution nation empire utopia and life were also subjected to incisive critical and methodological reflection and revaluation The chapters in this collection argue that Romanticism's marked ambivalence and resistance to decisive conceptualization arises precisely from the fact that Romantic authors simultaneously extended the project of European modernity while offering Romantic concepts as means for a sustained critical reflection on that very process Focusing especially on the topics of form both literary and organic secularization and its political correlates utopia and apocalypse and the question of how one narrates the arrival of modernity this collection collectively emphasizes the importance of understanding modernity through the lens of Romanticism rather than simply understanding Romanticism as part of modernity This book was previously published as a special issue of *European Romantic Review* *Current Catalog* National Library of Medicine (U.S.), 1993
