include secularism human rights democracy and capitalism have been celebrated as the culmination of centuries of human intellectual evolution This is the basis of the propaganda which has been used to foster a Clash of Civilizations where the Islamic world is presented as stubbornly adhering to the anachronistic idea of theocracy Where once the spread of Christianity and civilizing the world were used as pretexts for colonization today a new White Man s Burden makes use of human rights and democracy to justify imperial aggression However because after centuries of decline the Islamic world is incapable of mobilizing a defense the Western powers as part of their age old strategy of Divide and Conquer have fostered the rise of Islamic fundamentalism to both serve as agent provocateurs and to malign the image of Islam These sects known to scholars as Revivalists opposed the traditions of classical Islamic scholarship in order to create the opportunity to rewrite the laws of the religion to better serve their sponsors Thus were created the Wahhabi and Salafi sects of Islam from which were derived the Muslim Brotherhood which has been in the service of the West ever since But the story of the development of these Islamic sects involves the bizarre doctrines and hidden networks of occult secret societies being based on a Rosicrucian myth of Egyptian Freemasonry which see the Muslim radicals as inheritors of an ancient mystery tradition of the Middle East which was passed on to the Knights Templar during the Crusades thus forming the foundation of the legends of the Holy Grail These beliefs would not only form the cause for the association of Western intelligence agencies with Islamic fundamentalists but would fundamentally shape much of twentieth century history

*The Search for Beauty in Islam* Khaled Abou El Fadl, 2005-12-02 Khaled Abou El Fadl is a classically trained Islamic jurist an American lawyer and law professor and one of the most important Islamic thinkers today In this updated and expanded edition of *The Search for Beauty in Islam* Abou El Fadl offers eye opening and enlightening insights into the contemporary realities of the current state of Islam and the West Through a conference of the books an imagined conference of Muslim intellects from centuries past Abou El Fadl examines the ugliness that has come to plague Muslim realities and attempts to reclaim what he maintains is a core moral value in Islam the value of beauty Does Islamic law allow or even call for the gruesome acts of ugliness that have become so commonly associated with Islam today Has Islam become a religion devoid of beauty compassion and love Based on actual cases this book tackles different issues and problems in each chapter through a post 9 11 lens discussing such topics as marriage divorce parental rights the position of women the veil sexual abuse wife beating terrorism bigotry morality law and the role of tradition Abou El Fadl argues that the rekindling of the forgotten value of beauty is essential for Muslims today to take back what has been lost to the fundamentalist forces that have denigrated their religion

*Apostasie und Toleranz im Islam* Frank Griffel, 2021-12-20 The judgement of apostasy on the last page of al Ghaz l s *Incoherence of the philosophers* has long been considered as one of the key reasons for the decline of peripatetic philosophy in Islam This study is an inquiry into the different elements of Islamic thought which led to al Ghaz l s conviction that three important conclusions of peripatetic philosophy must be considered as heresy In its four parts the volume describes the early usage of the judgement on apostates

in Islam and the legal and theological developments which led to its application against the secret apostates It examines how during the last decade of the 5th 11th century the judgement could be turned against the philosophers Finally the study determines the early effects of al Ghaz l s judgement on the peripatetic philosophy both in the Mashriq and in al Andalus

**Islamic Natural Law Theories** Anver M. Emon,2010-04-08 This book offers the first sustained jurisprudential inquiry into Islamic natural law theory It introduces readers to competing theories of Islamic natural law theory based on close readings of Islamic legal sources from as early as the 9th and 10th centuries CE In popular debates about Islamic law modern Muslims perpetuate an image of Islamic law as legislated by God to whom the devout are bound to obey Reason alone cannot obligate obedience at most it can confirm or corroborate what is established by source texts endowed with divine authority This book shows however that premodern Sunni Muslim jurists were not so

resolute Instead they asked whether and how reason alone can be the basis for asserting the good and the bad thereby justifying obligations and prohibitions under Shari'a They theorized about the authority of reason amidst competing theologies of God For premodern Sunni Muslim jurists nature became the link between the divine will and human reason Nature is the product of God's purposeful creation for the benefit of humanity Since nature is created by God and thereby reflects His goodness nature is fused with both fact and value Consequently as a divinely created good nature can be investigated to reach both empirical and normative conclusions about the good and bad They disagreed however whether nature's goodness is contingent upon a theology of God's justice or God's potentially contingent grace upon humanity thus contributing to different theories of natural law By recasting the Islamic legal tradition in terms of legal philosophy the book sheds substantial light on an uncharted tradition of natural law theory and offers critical insights into contemporary global debates about Islamic law and reform

**The Rise of Critical Islam** Youcef L. Soufi, 2023 In a richly narrated historical study Youcef Soufi excavates an Islamic legal culture of critique from the 10th to 13th centuries Focusing on the practice of *mun ara* disputation Soufi explores how and why oral debates became a pervasive and revered part of the intellectual legal landscape of Iraq and Persia Using the life and career of celebrated Iraqi jurist Ab Is q al Sh r z he traces the formalization of debate gatherings at the dawn of the classical legal schools *al madh hib* in the early 10th century and analyzes the wider institutional social and discursive conditions that made debate an important feature of any jurist's practice Pushing back against claims that classical Muslim jurists sought to weed out differences of opinion The Rise of Critical Islam presents a community committed to the openness fluidity and continued exploration of the law Challenging the view of debate gatherings simply as mechanisms of doctrinal resolution before codification the study reveals a classical culture where critical debates were part of a continual and personal quest to discover God's law In uncovering this classical legal culture Soufi invites readers to question claims about the promise of secular critique in disciplining religious passions and forging human solidarity
