**National Legal Presumptions and European Tax Law** Claudia Sanò, 2016-04-24 Determining the burden of proof in tax law cases is usually what contributes most to the case's outcome Legal presumptions those inferences that are laid down in the law rather than being the result of the court's reasoning play a critical role in such determinations This very useful book uncovers the details of such presumptions which are shared among European tax law systems thus revealing a remarkably clear path through the course of a tax law case in any Member State in the context of EU law Referring to both legal theory and relevant case law the author assesses whether and to what extent national legal presumptions may be deemed to be consistent with EU law and when this is not the case under which conditions they may be reconciled The analysis unfolds along such avenues as the following the meaning of the concept of legal presumption as developed by legal theory and authoritative academic literature special considerations regarding presumptions in customs law VAT and direct taxation harmonized and unharmonized how tax authorities use presumptions to simplify the assessment of tax and tackle tax avoidance or evasion particularly in cross border situations justifications asserted by the Member States in relation to restrictions on fundamental freedoms and standards of compatibility for national legal presumptions with EU law resulting from CJEU case law With reference to national experience using Italy and Belgium as specific examples the analysis culminates in an elaboration of criteria for legal presumptions capable of meeting the test of compatibility with EU law As an in depth investigation of possible inconsistencies and conditions for the coexistence of EU and Member State tax law this book will be welcomed by both taxation authority officials and taxpayer counsel The understanding it imparts on the actual impact of EU law on the recourse to legal presumptions by national tax legislatures and the protection of European taxpayers is unsurpassed

Rescue of Business in Europe Bob Wessels,Stephan Madaus,European Law Institute,2020-01-30 This edited volume is based on the European Law Institute s project The Rescue of Business in Insolvency Law which ran from 2013 to 2016 The project sought to investigate and articulate the essential features of well functioning procedures for the rescue of distressed but viable businesses Although the focus was primarily on the design and implementation of formal procedures that is those provided by law the project also required consideration of the interaction between such procedures and informal solutions to distress given the obvious cost advantages of the latter The ELI project was not confined exclusively to restructurings since these are only one possible route to maximising the value of a distressed but viable business an auction procedure in which the business is sold on a going concern basis to a new owner is one obvious alternative The ELI project encompasses various aspects of both public constitutional law and insolvency law that may have a bearing on the functionality of formal restructuring procedures      **Power And Religion in Baroque Rome** P.
